Bitburg: Shock Waves From a False Step

By Henry Tanner International Herald Tribune PARIS - When President Ronald Reagan and Chancelior Helmus Kohl first agreed that Mr. Reagan should visit the German military cemetery in Bitburg but not the

concentration camp at Dachau, the **NEWS ANALYSIS**

initial outery came from the United

But the most lasting political damage may have been done in

The ensuing controversy brought it home to millions of Germans, who had hoped differently, that West Germany still was not a country like any other. It has failed to achieve that status in spite of its 40 years of democratic parliamentary institutions, its membership in the North Atlantic Treaty Organization and the European Community, its acceptance of the division of Dermany and its willingness to have on its soil the greatest concentration of nuclear weapons in the world in terms of territory.

"One false step and our 40 years of democratic history are wiped out," said an official in a govern-ment ministry in Bonn. "It is inout," said an official in a govern-ment ministry in Bonn. "It is in-structive. We have learned how wa-Bitburg. He said in a telephone and 76.3 percent to the democratic

Bonn Affirms Cemetery Visit

BONN —The West German government spokesman has affirmed Bonn's intention not to release President Ronald Reagan from his commitment to visit a German military cemetery next weekend.

"We are going to Bergen-Belsen to remember the victims of fascism, the victims of the rule of violence," the spokesman, Peter Boenisch, said Saturday in a televised interview, "and we are going to

Bitburg to remember the dead of the war."

Defending the decision in the face of criticism in the United States, he said: "Too many Americans and politicians in Washington still think we are trying to whitewash the Nazis or to detract from their crimes. But this was never our intent."

The U.S. Senate overwhelmingly urged Mr. Reagan on Friday to cancel his planned visit to the military cemetery. By a voice vote, the Senate adopted a resolution hailing the reconciliation between the United States and West Germany but adding: "The president should reassess his planned itinerary during his forthcoming trip to the federal republic of Germany."

shields us from condemnation by our allies and friends."

"The Satan image of the German and that the damage might be last-is back and everything will be more ing. difficult in the future, at home as well as in our relations with our neighbors," he said.

visit came under criticism.

Chancelior Kohl, who have much in common in political style, had come to regard each other as personal and political friends but have become estranged over Bitburg, and that this, too, will make relations more difficult.
When the implications of the

Other observers have pointed out that President Reagan and

Bitburg visit became clear in Washington with the realization that 49 members of the Waffen SS were buried there, the president reportedly called Mr. Kohl with a plea to be given a way out. Mr. Kohl responded with a speech to the Bundestag Thursday praising the presi-dent for his steadfastness and deploring his domestic problems. Foreign Ministry officials have complained to the West German

press that preparations for the Reagan visit were monopolized by offi-cials of Mr. Kohl's chancellery who were bent on organizing a striking media event but who overlooked all historical implications of their

The West German press, which was slow to pick up the case, has been writing that Mr. Reagan was sticking with the Bitburg plan only out of a sense of obligation to Mr. Kohl but that nothing good could come out of the visit now.

The Súddeutsche Zeitung, one of the country's most respected newspapers, in a editorial headlined "Not to Bitburg," pleaded with Mr. Kohl even after his Bundestag speech to cancel the visit to the Division That Massacred 642 French Villagers Represented

This visit "cannot become an expression of reconciliation, it can only deepen the estrangement and sharpen the bitterness," the editori-

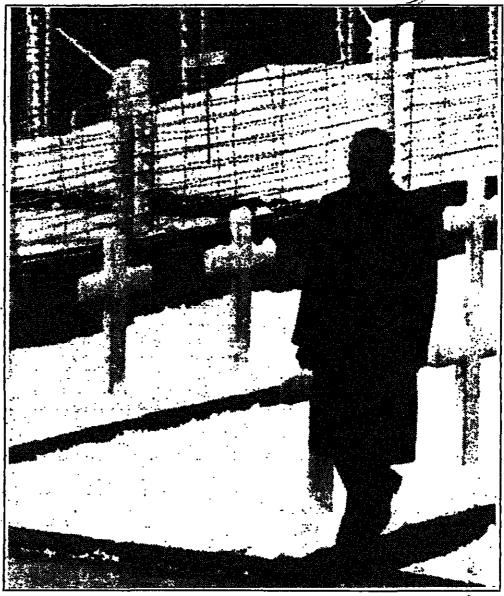

Diplomats and others have pointed out that the controversy was utterly unnecessary and could easily have been avoided.

There was no need for a symbolic show of West German-American reconciliation, they said, because this reconciliation has long been a fact of life that is inherent in the alliance, expressed in innumerable diplomatic conferences, enhanced by West Germany's industrial role in Europe and daily contact between citizens.

Most important, perhaps, from a inquiries about the graveyard:
"The Germans said everything German political and psychologi-cal point of view, the Bitburg conwas fine. Someone said, 'How do we know everything is fine?" The answer was: The chancellor said it-The U.S. investigation appeared to have focused almost entirely on While Mr. Reagan and the chan-

emphasized in Stockholm that the amount of plutonium used in the tesis had been about a gram, far short of the amount needed to The Swedish Defense Ministry

took issue sharply Saturday with the published reports.

A statement issued by Defense Minister Anders Thunborg said that Sweden had sponsored a series of "conventional explosion experiments which were undertaken 10 to 15 years ago on the shock-wave penetration of various metallic material, including small pieces of plu-

But a Swedish Embassy spokesman in Washington said that the man in Washington said that the explosions had not involved a molecular chain reaction.

Statements by Swedish officials in Stockholm that were reported Friday were concerned primarily with denying that Sweden deliber-"They look at Reagan different-ty," said W. Allen Wallis, undersec-to build an atomic bomb. to build an atomic bomb.

> Those reports did not contain the distinction made Saturday by the Swedish Embassy spokesman and the Defense Ministry between conventional explosions involving

plutonium and nuclear explosions involving the same metal.

The embassy spokesman said the intent had been only to acknowledge that plutonium had been involved in the explosions.

Sweden never has possessed at any one time more than 110 grams (about four ounces) of plutonium while it generally is accepted that 3,000 to 5,000 grams of plutonium are needed for a nuclear explosion, the spokesman said.

But conventional explosions have been used with small amounts of plutonium to produce molecular chain reactions in experiments by other nations.

sure of the tests, which came Thurs- tective," aimed at defending neubanned research geared toward producing a nuclear bomb.

pledging not to acquire nuclear weapons production capability.

Prime Minister Olof Palme, a Social Democrat who has played a leading role in seeking nuclear-free zones in Europe, said that "no mclear weapon has ever been con-

structed or exploded in Sweden."
But he added that it was sometimes hard to define the limits of "research aimed at protecting the Swedish population against nuclear arms," which Swedish law al-

Miners Dismissed In S. Africa 15,000 Blacks Lose Jobs; Many Continue Protest

ESTABLISHED 1887

Compiled by that Staff From Dispatches JOHANNESBURG - About 15,000 black South African miners have been dismissed after carrying out work stoppages, and many have locked themselves into hostels at the world's largest gold mine to protest the action.

The dismissals were announced Saturday by the Anglo-American Corp., which dismissed about 13,000 of the 40,000 blacks at its Vaal Reefs mine, and by Angloyaal, which dismissed about 2 000 members of its work force of 16,500 at the Hartebeessontein complex. Both mines are west of Johannes-

A spokesman for Anglo-American said that production losses at Vaal Reefs, the world's largest mine, would cost up to 25 million rand (\$12.5 million) and that work would stop for about two weeks. Vaal Reefs and Hartebeesfontein produce one-sixth of South Af-

rica's gold, and gold accounts for about half of the country's export When the workers have been paid they will be sent back to black homelands. Under South Africa's

racial segregation laws, they are not permitted to remain in the mine Cyril Ramaphosa, president of the black National Union of Mineworkers, said that workers

had locked themselves into hostels at Vaal Reefs and were refusing to "It is a state of siege," he said. Mr. Ramaphose said that the police had used tear gas to force work-

ers out of hostels, but a mine spokesman said that no police were in the area. A spokesman for Anglo-Ameri-can said that the men "effectively

fired themselves" when they ignored procedures for wage disputes and refused to go into the mines

Friday and Saturday.

"We expect most of the workers to re-apply for jobs," the spokesman said, "and this will be considered according to their record."

He said that the miners had struck to press demands for a 10percent increase in their average monthly salaries of 300 rand. Miners receive room and board in addition to their wages. Mine officials averaged about 420 rand a month.

The strike "has ignored the agreed procedures and is totally illegal," the spokesman said. "The company had no option but to dismiss the men.

In continuing unrest in black communities across the country, the police used tear gas and rubber bullets to counter stone-throwing

Richard R. Burt, assistant secretary of state for European affairs, informed the acting Soviet ambassador. Oleg Sokolov, on Friday that Lieutenant Colonel Stanislav Ivanovich Gromov has seven days to leave the United States. Mr. Burt demanded clarification of the Soviet position on the death of Major Nicholson and insisted that Moscow abide by an agreement reached April 12 between U.S. and Soviet military officials, a State Department statement said.

The State Department said the Soviet side had agreed to take measures to prevent a repetition of the incident by prohibiting the use of force or weapons against members of the U.S. military liaison in East Germany. as provided in a 1947 agreement. Last Monday, however, the Soviet Union issued a statement reserving the right to deal with any "intruder" on an "intelligence mission" according to Soviet military manuals rather

Honecker to Leave Post, Weekly Says *

HAMBURG, West Germany (AFP) — Erich Honecker will step down next year as head of East Germany's Communist Party but will continue as the country's president, according to an article to be published Monday in the news weekly Der Spiegel.

The magazine said Mr. Honecker, who is 72, will remain a member of

the Politburo. It said he had made the decision because of his age. Der Spiegel predicted that Mr. Honecker would resign at the party's congress next April and that he would be replaced by Egon Krenz, a

Chile Arrests 264 at Socialist Rally

SANTIAGO (AP) — Chile's military government has seized at least 264 participants at an indoor rally of the Socialist Party and accused them of plotting May Day violence.

Witnesses said that uniformed policemen entered an auditorium in central Santiago during a Friday evening program of speeches and revolutionary folk music sponsored by the electricity workers union and ordered everyone to board police buses.

In a communiqué issued Saturday, the Interior Ministry accused participants at the rally of "planning acts to disturb public order" on Wednesday and possessing "subversive literature." General Augusto Pinochet rules Chile under a state of siege that bans unauthorized political gatherings.

prescribed limits. At the root of the French posi-

view, supported by the other sum-mit countries, is that sound management of national economies keeps currencies in line, the administration contends, not management of the currencies themselves. But the exceptional strength and more recent volatility of the dollar have also worried the administraof foreign goods, the dollar's strength has caused record U.S. trade deficits and forced farmers and companies out of business. Partly to deflect the French, but

also to show support of more active government intervention to prevent disorder in the currency markets, Treasury Secretary James A. Baker 3d earlier this month said that "the United States is willing to consider the possible value of hosting" a multinational conference to explore the question.

Trade issues are equally divisive. The question before the summit meeting is the U.S. insistence on a specific date to begin a worldwide round of negotiations to eliminate obstacles to free trade in agriculture and services, including nontariff devices such as farm subsidies and Japanese measures to block

foreign goods.
"I think that one of the things that is of great importance that we want to be talking about is another The issue of exchange rates round of trade talks to resist the dents in an interview that the White House released on Saturday. But the United States is the most

openly committed to free trade, and not solely because of its commitment to unregulated markets. Protectionism, in the form of price supports to farmers, increases the government spending that the administration is trying to reduce.

In return for cutting its aid to farmers, the administration wants to assure them greater access to The Reagan administration's world markets. The reductions in government farm supports could pass Congress late this year, so there is some urgency to the administration's appeal for trade negotiations. "We need a date to discipline the process of getting started with the talks," said Beryi W. Sprinkel, the chairman of the Council of Economic Advisers. "We want to tion. AMERICAN TOPICS

DAR Is in Step With the Times

The Daughters of the American Revolution, who barred the singer Marian Anderson from their Constitution Hall headquarters in Washington in 1939 because she is black, has been admitting blacks as members since 1977.

The DAR has long aided education, conservation and the preservation of national monuments. Last year it published Robert Ewell Green's "Black Courage, 1775-1783," a survey of black soldiers who fought in the war for independence. It has hired James Dent Walker, a genealogist, to identify members of minority groups who served in the Revolution.

The Daughters retain their conservative outlook. At their 94th annual Continental Congress this month, they passed resolutions supporting the Strategic Defense Initiative, a balanced budget, "freedom lighters" in Central America and the government of South Africa.

Short Takes

The U.S. Department of Ag-neulture is spending \$5.3 million a year on research to develop a "safe cigarette." Lynn Kosak-Channing, a departmental chemist, says cross-breeding and gene-splicing are being used to try to develop tobacco "free from harmful compounds." Representative Henry A. Waxman, a California Dem-ocrat, said, "I think it is a waste of money."

State and federal prisons held nearly 464,000 inmates at the end of 1984, a record high for the 10th year in a row, the Justice Department says.

Until about 15 years ago, the navy named its submarines after fish. Declaring that "fish don't vote," Admiral Hyman G. Rickover, who was running the nuclear submarine program, started having subs named after members of Congress influen-tial in military affairs, or their hometowns. Now the navy, which already has restored bellbottom uniforms and traditional seagoing terminology, has announced that it is going to start using fish names again, but only for one class of subma-

The Boston Latin School. founded a year before Harvard University, observed its 350th anniversary last Tuesday. The oldest public school in the country, its alumni include Benjamin Franklin, John Hancock. Leonard Remstein and such men of letters as Cotton Mather, Ralph Waldo Emerson, Henry Ward Beecher, George Santayana, Bernard Berenson and Theodore White. It started admitting girls in 1972. Since 1974, about a third of its pupils have been blacks and Hispanics.

Notes About People

The president and vice president of the United States have

official residences and now the State Department is looking for one for the current secretary of state. George P. Shuttz, and his successors. Representative Thomas E. Petri, a Wisconsin Republican, says that all major officials soon will hold forth ly palaces scattered about the city." The congressman said, "Let's stop this residence prolif-

eration before it starts." More than 100 unpublished letters and 40 first editions by Ernest Hemingway have been donated to Stanford University in California by Charles Field, a San Francisco financier, Carlos Baker, Hemingway's biogra-

pher, says the collection should prove to be as important to Hemingway scholars as those at the universities of Virginia. Texas, Princeton and Harvard.

A Tip of the Hat To Slouch Wearers

Deploring the current disuse of hats in the United States, Douglas Gibboney, writing in The Washington Post, notes that "hats are a tradition with deep roots in American history. Where would we be without Washington's tricorn, Lincoln's stovepipe or Davy Crockett's coonskin cap?"

Mr. Gibboney is particularly disturbed that slouch hats are seldom seen. "Robert E. Lee, George Armstrong Custer, Ted-dy Roosevelt and Humphrey Bogart all favored slouch hats. Can such a diverse group of distinguished Americans be be wrong?" he asks.

The writer says that President John F. Kennedy is often blamed for taking hats off American heads because he did not enstamarily wear one, but in truth, the slouch hat already had begun to hit hard times." Its brim had been sadly narrowed by the dictates of fashion and "stiff construction prevented proper shaping to fit one's personality," he says.

Will the slouch hat make a comeback now that it's being Indiana Jones films? Time will

Press Cites Flaws in U.S. **Test of Pool** Reporting

By Bill Keller

New York Times Service
WASHINGTON — The Penuagon's first test of a system for artanging news coverage of emergen-cy military operations, initially marred by a breakdown in secrecy, was later hampered by a brenkdown in communications, partici-pants in the exercise said.

Reporters who were flown to Honduras in the experiment on April 21 said Friday that their reports to Washington were delayed because U.S. Navy technicians were unable to make the telephones work on the helicopter carrier Nassau and because a teletype machine was busy with routine military mes-

sages.
Television and radio correspondents were able to transmit their news only by banding off their material to reporters based in Tegucigalpa, the Honduran capital, a convenience unlikely to be available in a war zone. The first dispatch from the group

arrived 21 hours after it was written Tuesday afternoon. The Pentagon failed miserably," said Benjamin Shore of Cooley Newspapers, "with the one

thing we wanted to make this an effective exercise — that is, the ability to file. I think we could have done a lot better with carrier pi-Howell Raines of The New York

Times said the technical problems were complicated by the reporters' military escorts, who treated the reporters' need to send dispatches with, "initially, courteous indifference, and then hostile indiffer-

He described the experience as "the collision point between two professional cultures that don't understand each other very well." A spokesman for the Pentagon, Michael I. Burch, promised a full review of the operation.

The reporters agreed with Pentagon officials that the problems could be remedied and that such press pools were a valuable way of assuring that reporters could witness the initial phase of a surprise military operation. The pool of 10 reporters and

photographers was rapidly assem-bled and was dispatched, without being told the operation was an exercise, to watched previously announced U.S. military maneuvers off the northern coast of Honduras. The operation initially went

awry April 21 when word of the supposedly secret mission leaked out, and the Pentagon confirmed it to other news organizations.

Jet Loses Engine, but Industry Wins Star for Safety

By Richard Witkin

New York Times Service NEW YORK - A recent incident in which a rear-mounted engine tore away from an American Airlines Boeing 727 jet over New Mexico has stirred a good deal of interest, but not because of any concern that a similar engine failure could be disastrous. On the contrary, the incident is being viewed as a model of engineers' success in designing safety into aircraft.

There been a dramatic improvement in the overall trend in jetliner accidents in the past two decades, from 59 in 1964 to 12 last year. Until an Eastern Airlines jet struck a mountain in January, U.S. passenger carriers had gone 30 months without a fatal crash.

These days, the rare crash that does occur can almost never be attributed to a design flaw, such as those that caused crashes of the DC-6, Constellation, Stratocruser, Martin 202. Electra and DC-10 aircraft over the years. Today, the fault usually can be traced to either or both of two hazards for which the industry has not yet found adequate solutions: bad weather or human error, by pilots, mechanics or air-traffic controllers.

EWORLD OF BIG BUSINESS JETS MEETS THE LEADER. THE FALCON 900.

A Falcon 900 demonstration [light. January 15,1985.

The Falcon 900 demonstrates leadership qualities in every important respect. First, it offers an extraordinary level of passenger comfort. All passengers who flew in it are unanimous to praise the quietness and comfort amenities of a very large cabin (2.34 m wide over 10 m long and 1.87 m headroom).

The Falcon 900 is a Leader in performance, too. With an effective range of 7,000 km (carrying 8 passengers and NBAA IFR reserves), it can easily fly from Paris to New York, from London to Abu Dhabi, from Tokyo to Jakarta. And the Falcon 900 can climb directly to 39,000 ft which puts it above international commercial air traffic. The Falcon 900 can cruise at up to Mach .85 (904 km/h) and has been flown at 94% of the speed of sound in test flights.

The Falcon 900 is also the Leader in efficiency. For long range operation, take-off weight is 20 tons, 10 tons less than its closest competitor under the same conditions and with the same

payload. Thanks to its latest-generation Garrett engines, its excellent aerodynamics and lighter weight, the Falcon 900's fuel consumption is record-breakingly low: some 1/3 less than the above competitor, whose engine consumes almost as much fuel when idling on the runway as that of the Falcon 900 when cruising at Mach.80.

These figures highlight the sophisticated aerodynamic design of the Falcon 900, utilizing Dassault computer technology developed for the famous Mirage fighters - an experience that's unique among producers of business jets.

The Falcon 900 also scores first for safety. In the unlikely event that one engine should fail, the remaining two can easily supply the requisite thrust and maintain operation of the aircraft's critical systems. This level of security obviously cannot be matched by twin-jet aircraft, either now or in the future, whatever the developments in international regulations.

If you would like to know more about the

Falcon 900, please contact us for full information. It will be our pleasure to introduce you to the new Leader in the world of business aviation - the

Gorbachev Says Soviet Offered **Mutual 25% Arms Reduction**

By Bradley Graham
Washington Post Service
WARSAW — The Soviet leader. Mikhail S. Gorbachev, has said that the Soviet Union suggested at the Geneva arms talks that both sides reduce their strategic arsenals

But in Washington, Reagan administration officials denied that the Soviet negotiators had made any new initiatives.

In remarks reported by the Soviet press agency Tass, Mr. Gorbachev told his allies Friday at the Warsaw Pact summit meeting here: "We have already suggested that both sides reduce strategic offensive arms by one-fourth as an opening move.

He added: "But we would have no objections to making even deep-er mutual cuts. All this is possible if the arms race does not begin in space, if outer space remains an area of peace.

Soviet Prints U.S. Envoy's Plea for Peace

By Seth Mydans New York Times Service

MOSCOW - The government newspaper Izvestia has published a letter from Ambassador Arthur A. Hartman of the United States that recalls the meeting of U.S. and Soviet soldiers on the Elbe River 40 years ago and that says that the United States seeks peace.

Diplomats said the U.S. Embassy was taken by surprise by the appearance of the letter Saturday. It was submitted to the Foreign Ministry for publication three

The ambassador's latest letter said: "President Reagan has said that a nuclear war 'cannot be won and must never be fought." That view has been at the root of American foreign policy since 1945, and remains so today.

The message of peaceful intentions runs counter to the picture of an aggressive United States that the want to "allow to take place." In Britain,

many, and is considered a symbol of the victory of the anti-Hitler

Mr. Hartman wrote: "As' a my countrymen and Allies, I well remember the event, and the joy and hope it inspired. Two great — if profoundly different — peoples had at long last linked up in a common cause. In that bright spring of 1945, nothing on earth seemed impossible.

"Much has changed since then.

Europeans Disapprove of Plan to Visit Cemetery

By Richard Bernstein New York Times Service

PARIS — Western Europeans, including those from countries once occupied by Nazi Germany, watched the furor over President Ronald Reagan's planned trip to a German military cemetery for several days with little comment or protest of their own. But in the last few days, as the

controversy has grown in the Unit-ed States, a modest swell of com-ment, most of it critical of Mr. Reagan, has emerged in several countries.

Prime Minister Margaret Thatcher of Britain became the only major Western European leader, except for Chancellor Hel-mut Kohl of West Germany, to comment directly on the issue when she distanced herself from Mr. Reagan's plans.

Responding in Parliament on Thursday to a Labor Party member's comment that the president's proposed visit to the Bitburg mili-tary cemetery was "insulting and offensive," she said: "I am not re-sponsible for the activities of the United States. I have considerable sympathy with what you say."

Diplomats in several countries said there had been considerable reporting by European journalists in the United States on the intense opposition the visit has aroused there among Jews and others, including members of Congress.

But they said both reporting and commentary had generally beenovershadowed by other foreign poa letter from Mr. Hartman marking licy issues, particularly the admin-the 50th anniversary of diplomatic istration's policies in Central

A Dutch newspaper, NRC Han-delsblad of Rotterdam, said: "The White House and the chancellery have walked into a political and psychological minefield."

The paper expressed the view that Mr. Reagan was refusing to alter his plans because he did not want to "allow a diplomatic affront

In Britain, The Observer newspaper said: "Nothing Ronald Reagan has done in his four and a half years as president of the United States has been as inept as his stubborn insistence that he will visit a German war cemetery where SS troops lie buried."

"Hastily adding a concentration camp site to his itinerary — as if this were a matter of balance or 'equal time' - merely emphasizes the president's grotesque insensitivity." The Observer said. "Mr. Reagan's blithe remarks last week that German soldiers were victims just as surely as the victims in the young airman who served in the concentration camps further dem-Far East, along with thousands of onstrated the limits both of his inonstrated the limits both of his intellect and his imagination."

> In France, newspapers have given attention to the issue as it developed in the United States. A headline in the leftist daily Liberation said: "Reagan: Zero in History."

Le Monde said in an editorial, referring to the good relations be-tween the Germans and their former foes: "The reconciliation that has, in fact, existed for some time, cannot be justified if it rests on the But he said the postwar period scattered cinders of forgetfulness.

"To switch the roles formerly played by the victims and their exe-cutioners," it said, "is a vice already the leader of the major power in the

President Reagan and President Chun of South Korea and their wives at the White House.

Reagan, Chun Encouraged by Steps * By Koreas Toward Reconciliation

By Bernard Gwertzman

New York Times Service WASHINGTON - President Ronald Reagan and President compelled to consider a peaceful Chun Doo Hwan of South Korea have expressed concern over the continued forward deployment of North Korean troops closer to the demilitarized zone separating the

two Koreas. But after a White House meeting Friday, the two leaders also said that they were encouraged by steps toward reconciliation being made between North Korea and South

A senior administration official who took part in the meeting said that although North Korea's military moves and its agreement to meet next month to hold talks on trade relations seemed contradictory, they probably reflected North Korea's uncertainty over how to achieve its longstanding goal of

Korean unification. The official said that in the past Korea by force, but was now being

[Mr. Chun arrived Saturday at Hickam Air Force Base, Hawaii, ternational reported from Hawaii.]

Mr. Chun pledged to Mr. Rea-gan that he intended to carry out his promise to retire from office in 1988 and allow the peaceful accession of a civilian government.

There has never been a peaceful change of government in South Korea. U.S. officials said that Mr. Reagan, in the meeting, praised Mr. Chun for his "historic" pledge and for recent changes that had opened up the political scene to many opposition figures.

The security situation in Korea was the most important aspect of the visit for the South Koreans.

North Korea had given priority to the possibility of taking over South treaty commitment to come to their defense as a major deterrent to another war with North Korea.

The North Koreans have reorga-nized their forces along the demilitarized zone in recent months, confor an overnight stopover before verting infantry forces into returning home. United Press Inmechanized units and placing artillery in offensive positions, U.S. officials said.

Mr. Reagan said: "The ties linking the republic of Korea and the 3-United States are many and strong. Our security ties, which I reaffirmed today, remain the linchpin of peace in Northeast Asia."

Mr. Chun replied that he was convinced that the United States would "resolutely cope with any military adventurism or terrorist attacks of North Korea against the peace of this region."

Rebellion in Sudan Unsettles Region Regime May Shift from Pro-U.S. Stance to Quash Revolt

By Jonathan C. Randal Waskington Post Service

KHARTOUM, Sudan — The refusal of the leader of the southern Sudanese insurrection to negotiate with the new government has aroused fears of major changes in the political balance in the strategic Horn of Africa

Not since once pro-American Ethiopia switched sides to the Sovi-

NEWS ANALYSIS

et Union in the mid-1970s has the stage appeared set for such a potentially momentous restructuring of power and influence in the region. according to diplomats and Sudanese analysts.

At stake is a possible shift by Sudan away from its orientation toward the United States and Egypt to closer ties with Ethiopia and Libya, which are backed by the Soviet Union, in an effort by the new government in Khartoum to eliminate the rebellion in the country's south. Sudan, whose control of the waters of the Nile is vital to Egypt, receives more U.S. aid than any other country in sub-Saharan

Africa. Three weeks after President Gaafar Nimeiri was deposed, analysts have tentatively concluded that John Garang, leader of the Sudan People's Liberation Army, seems determined to bring down the fledgling military transitional

Far from from ending his twoyear-old insurrection after the overthrow of his old enemy, General Nimeiri, Mr. Garang has warned that his forces will soon expand the war by fighting in the north as well

1816, is about Tamerlane, Mr. He also gives every indication of Marchand was quoted as say-ing. Tamerlane, a 14th-century maintaining his refusal to deal with the transitional military council or Turkish conqueror, was known the civilian cabinet. The council appears determined

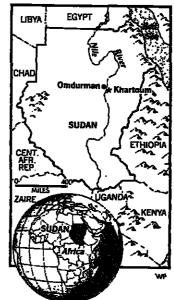

to force Mr. Garang into negotia-tions by initiating high-level con-tacts with Libya and Ethiopia, which previously had been hostile to Sudan, in hopes of persuading them to end financial and military support for the rebellion.

Analysts predicted that Libya would press for a major change in

79 Are Killed in a Fire At Argentine Hospital

BUENOS AIRES - Seventynine people died and 247 were in-jured when flames swept through a private mental hospital, according to the federal police. Police and fire department inves-

tigators said Saturday that the cause of the fire Friday at the St. Emilienne Neuropsychiatric Institute in the suburban neighborhood of Saavedra has not been determined. The hospital's director and administrator were in custody until they could be questioned by a judge investigating the cause of the fire.

Tigre and Eritrea provinces.

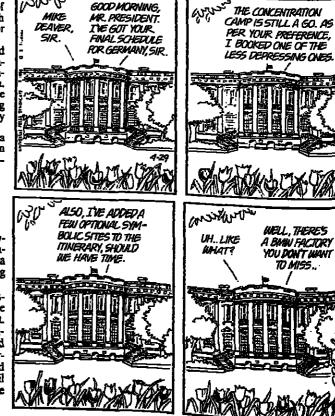

Yet few northerners appear to have understood the message in his daily broadcasts from a clandestine radio station in Ethiopia in which he says he is prepared for a long struggle to reorder power in a future socialist Sudan. Sudan's pro-Egyptian and pro-American policies in return for

General Nimeiri's introduction of sharia, or Islamic law, in the non-Moslem south after he took power in 1969 was a key factor in the resumption of the rebellion.

Some foreign analysts say Sudan rapidly is becoming so exhausted by famine, financial crisis and the war that Mr. Garang's "black power" dream may for the first time be within his grasp.

"Six months ago I would have said it was impossible for a south-Mengistu Haile Mariam, seeking to erner like Garang to take power." a European diplomat remarked. "Now I think it's possible but only [Sudan's new defense minister, after the Sudan goes through a Brigadier Osman Abdullah Molong, painful process of unravel-harumed, said in Doha, Qatar, on ing."

ADB's president, Masao private sector - when such

ASIAN DEVELOPMENT BANK

ADF Replenishments.

Wanted: Five Billion Dollars to Launch 'The Asian Century'

t takes about two years for representatives of the donor members, developing country members and staff of the Asian Development Bank to hammer out their four-year replenishment programs for the Asian Development Fund - the 'soft window' or grant content lending arm of the Bank. For that reason alone, there is likely to be more heat than light generated at the impending "Eighteenth Annual Meeting of the Board of Governors" from the ADB, to be held in Bangkok from 30th April to 2nd May. This forum will provide a venue for the first round of talks on replenishments for the Bank's "ADF 5" soft window between staff and donor members to cover the period from 1987-1990.

Leading Western donors would like to reduce concessionary lending outright or find a formula to make it cost more to the recipient nations, either in actual service charges or in policy emphases that favor "privatization" for their economies and reduction of price subsidies. The West has suffered slower economic growth rates and so has less wealth or less willingness to transfer it to the region's poorest nations. Some, such as the United States and United Kingdom, also have more fiscally conservative governments on matters of foreign aid.

In an effort to determine what "wealth" developed countries have to transfer for Asian development, ADB staff members took the mean figures from calculations in the World Bank's World Development Report, 1984. An ADB working paper released to the IHT suggests the combined total Gross National Product (GNP) in ADF donor countries will be close to US\$11 trillion in 1987, as calculated by ADB staff using a summary projection for price and income growth. An "ADF 5" replenishment of the US\$5 billion requested (at US\$1.25 billion per annum) would comprise only 0.011 per cent of their GNP that year. In other words, in the view of ADB staffers, the donor countries can still easily afford to support "ADF 5".

Bank's role as Honest Broker

The Asian Development Bank plays the honest broker among many competing interests. There are 45 member nations represented by a dozen "constituencies" whose representatives sit on the Bank's Board of Directors. It evaluates which countries are eligible for the concessionary lending - since 1973 this has included 20 countries - finds and fund projects, monitors their progress, evaluates their results and enters into policy dialogues. with recipient government leaders and administrators.

The Bank sees US\$5 billion as the amount required to keep its recipient countries moving toward ecomomic independence in the "ADF 5" period. If history is an index, most of this money will go to five South Asian countries: Bangladesh, Pakistan, Burma, Sri Lanka and Nepal. According to Bank sources, they have already been the beneficiaries of 87 per cent of Asian Development Fund lending since the program began in 1973. The promise of the much heralded "Asian Century" has yet to suggest itself strongly in South Asia and 12 to 20 per cent of all their grant content aid from multilateral institutions comes

Donors see the strength of Asian growth indeces and confight for its allocation from the Western donor countries.

Burma Electric. Lineman of the Electric Power Corporation install a transformer in Rangson.

clude that the "Asian Century" has arrived and they can start to reap some of the benefits from investments they've sown, or at least cut the cost of continuing planting.

Receivers meanwhile, enforce economic self-disciplines many Western states would find unthinkable and often gain or lose ground in the absence of stable Western development. Examples would be the "oil shock" of the 1970s, which caused developing Asian countries to spend up to 60 per cent of foreign exchange earnings on imported oil. Now there is a glut and things have somewhat improved, but this is recovery rather than progress. In the same way, real dollars of aid from multilateral donors to the ADB have shrunk against the US dollar, but exports have improved because of devalued Asian currencies.

Advocate for the Region

The ADB is by definition an instrument of advocacy for the region's growth - as a "region". Having concluded Asia's poorest nation's need US\$5 billion for growth (actually even this figure assumes a shortfall), the staff members must now

sponsored a conference on privatization policies, methods and procedures in Manila. Late last year, the Reagan administration appointed a "supply sider economist", Joe O. Rogers, formerly with U.S. Congressman Jack Kemp's staff, to replace a Carter appointee on the ADB board. The Bank's quiet office cubicles have been abuzz with reactions to what have been viewed by some staff and other board members as his brash assertions about public sector ineptitude and naive assumptions about achievable changes in the policies of recipient nations. Although the ADB President, Masao Fujioka, was noticeably guarded about prospects for ADF funding requests in a recent interview, the Bank's Vice President of Finance and Administration, S. Stanley Katz, has been quietly presenting the case for

The issues and arguments will go public in Bankok, but

sabers have been rattling since early this year, when the Bank

replenishment in the United States and publically using "The Asian Century" theme as a way to chide Western donors into increased financial support. In a recent IHT op-ed article, Katz contended that multilateral lending institutions like the ADB are beliweathers of Western participation in Asia, "But the continent's move toward the center of the world economic stage is hardly reflec-

ted in Western policies and programs." In an oblique swipe at tied bilateral aid favored by the Reagan administration, he extolled the sweet side of the classical "guns or butter" economic equation arguing that, "As a first step, they must realize that ecomomic development, not military hardware, is Asia's top priority . . . Whereas U.S. officials who visit Asia usually leave behind mutual security agreements, Japanese officials leave behind lines of export credit."

The United States will pay its arrears

A press analysis early this year suggested President Fujioka has been too accommodating to pressures from Washington, and that the United States has stayed in arrears on its promised payments to the ADF from earlier periods as an instrument of policy. In an IHT interview, Fujioka stated that he has no reason to believe the Reagan administration is intentionally not paying its soft window bills, a view confirmed by various staff members and the U.S. representative, Joe O. Rogers.

The United States has promised to pay its arrears amounts without prejudice to the "ADF 5" negotiations, according to Bank spokesmen. That means, in addition to whatever the Reagan administration is willing to support in the next cycle, it will have to pay up US\$28 million it still owes from "ADF 2" (1976-1978), another US\$63 million it owes from a payment tranche due in 1984, its 1985 payment tranche of US\$130 billion (both from "ADF 4").

The reason the U.S. failure to pay its bills was viewed as a policy lever is that its payment tranches are triggers for payments from other donors. Consequently late payments have also held up a US\$65 million payment from Canada. The argument was that the U.S. dragged its feet on payments intentionally to lock the payment triggers and starve the Bank into submission to its will on matters of policy.

Fujioka's US\$5 billion request suggests anything but timidity.

99 1/2 %

from an ADB request for US\$4 billion to an eventual final commitment of US\$3.2 billion. This reduction was precipitated by the inability or unwillingness of the U.S. administration to prise more money from its Congress.

The U.S. contribution to "ADF 4" fell from its usual 22 per cent of total lending to about 16 per cent. Japan, meanwhile, increased its share from its usual one-third to about 38 per cent. The U.S. broke with a tradition of rating its contribution as a percentage of the total and instead presented the Bank with a flat dollar figure, from which it would not budge.

According to Daud Ilyas, financial advisor to the Bank's Treasury Department, the Reagan administration did not anticipate the shortfall, which resulted from maneuvering in Congressional committees, and that they've promised to restore the usual percentage relationships rather than rely in future on such financial fait accompli.

Whether by Congresssional acceident or Administration design, the end result of the U.S. position was to cause a 2.7 per cent decline in ADF lending in 1984. The pressure for replenishments is made greater because it is anticipated that by the end of 1986 there will be no ADF resources left for any further loan commitments. This has made observers jittery and given the Reagan administration a whiphand in this year's negotiations, since the United States is the second largest donor, a later payer and its current Administration is no friend of

Joe Rogers Tells All

What America wants in Trade

Ithough the United States is not the largest lender nation to the you to do is to take on a very Asian Development Bank, it's become the most obstinate - and thereby the one to watch in the upcoming Board of Governors meeting in Bangkok. Supply-siders in the Reagan administration believe America has a new and better way to export the ideology of private property, by arguing for its role as the only successful generator of economic growth. Following the so far politically successful application of the formula in the United States, they now mean to undermine state-run economic institutions overseas and force their divestment

into private hands. Using a combination of running criticism for all public sector involvement in the provision of goods and services, an absolute faith in the necessary superiority and efficiency of the private sector, and the "magic of the marketplace" as the only workable determinant of what's in the public good, Reagan administration government appointraditional limitations. tees have been most notable for their efforts to divest their departments and agencies of funds and authority - in effect to reduce the scope of or eliminate their own agencies and jobs. Joe O. Rogers, director of the U.S. constituency to the ADB Board of Governors, has brought that winning,

In his mid-thirties, Rogers is an economist who was formerly chief of staff with Congressman Jack Kemp. In the six months since he's been at the Bank's Manila headquarters, he's been an outspoken critic of current Bank priorities and has probably had a lot to do with its impulse to schedule a spate of conferences and internal reports focused on issues of privatization, developing capital markets, strategies for assistance to the private sector, raising national savings rates, bank lending without government guarantees, and domestic preference policy for procurement. Rogers wants future aid tied to policy promises by recipient nations that assure a program of state divestitures, and he wants the Bank's measures of success on projects tied to the same

Fujioka, asserts that the Bank has always supported the

Rogers feels the Bank has remained too much of a neutan advocate for private sector development for the same reasons Fujioka cites as

to Policy Changes . . . "The main thrust of U.S. participation in the Bank is to bring to the ADB as well as to the other multilaterals, that sectors. In other words, that assistance which makes the same kind of economic philosophy and changes in public sector more efficient is economic policies which the as useful an instrument of President's been pushing for change as one that favors at home. The U.S. unlike divestment to the private sector. Rogers might accept some of the other constituencies and certainly unlike the this as an interim comso-called 'development compromise, but would never see it as a successful application munity' completely rejects the of Bank lending policy. idea that there is such a thing Representatives of 45

We think there's only one economics, and it applies to all countries, and all peoples. The notion that you have to do something different in countries because they're poor is something that has no r in the formulation of economic policy. What that leads that you purport to help. Our view is that all people react to economic incentives in the same way. The purpose we have is to move all the countries forward to a democratic-capitalist framework.

The ADB is just one institution within a whole framework of international So we have moved much large is about theirs. In that misnomer. What we're looking for here is a dismantling of representatives are keen to tion of goods and services. We're not looking at the pretrade for its Asian aid. In a sent time for this to spill over into all the traditional utilities that countries have operated. though we think that is certainly one of the longer term target areas: to also place those in private hands. As a first effort, you have to stop giving money to state-owned enterprises. To show you're serious about having them sell off the ones they own, you have to stop funding the ones that exist.

The U.S. is currently taking an internal review of its policies towards these things and certainly will actively push these policies. I think that you'll see over the next four years of the second Reagan administration a much more forceful move in

We are looking for a change in the way that the Bank conducts its lending program. Currently Bank staff go out and find a project and then sniff around to see if there are any policy changes possible within the leverage of that project. The United States would like to see a change, so that we would go out into the field looking for those policies which are detrimental to economic growth. Then send into the country a technical assistance project, which would help identify why those as 'development economics'. Continued overleaf

18th Annual ADB Meeting to be held in Bangkok

The 18th Annual Meeting of the Bank's Board of Governors will be held at the Dusit Thani Hotel, Bangkok, Thailand, from 30 April to 2 May 1985.

More than 1,000 participants, including Governors and their advisers from the Bank's 45 member countries, observers from international organizations, leaders of the international banking financial and development community, and the press corps, are expected to attend the meeting, which is considered Asia's most important financial conference of the year, according to a Report in the ADB Quarterly Review for January 1985.

The occasion will provide an opportunity for the Governors to discuss the economic problems of the Asian and Pacific region, to review the Bank's progress and to guide its future

operations. The Board of Governors is the Bank's highest policy-making body. All the powers of the Bank are vested in the Board of Governors, which may delegate its power to the Board of Directors except on certain matters such as admission of new members, change in the authorized capital stock of the Bank, election of Directors and the President, and amendment of the Charter.

Thai International celebrates twenty years of profitability

Prime candidate for 'privatization'

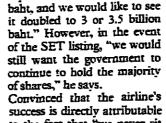

Then Thai International's Chairman Air Chief Marshal Prapan Dhupatemiya lays the foundation stone for the carrier's new 22-storey headquarters tower on May 1st, its 25th anniversary, he will be inaugurating a significantly new chapter for the national airline. Twenty consecutive years of top profitability for Thai, in an industry that has been beset by more than its full share of woes, have earned accolades for the airline as an acknowledged leader in the field of aviation in Asia.

"Thai's rapid expansion in the last decade has more than paid off," says its Executive Vice President/Marketing Chatrachai Bunya-ananta, pointing with pride to the airline's "blue chip" credit rating among international bankers for once. For a fledgling national carrier in the developing world, whose origins were sometimes shrouded in controversy, Thai's remarkable turn-around can be directly attributed to its efficient management policies.

Today, the 100 per cent stateowned enterprise - the Finance Ministry holds 84 per cent, with the remaining 16 per cent in the hands of the Communication Ministry and the local carrier, Thai Airways - is without a doubt one of the country's most profitable, next to the Electricity Generating Authority of Thailand (EGAT), and a prime candidate for "privatiz-

Thai International's President Air Chief Marshal Janya Sukontasap says he welcomes "the decision to sell shares on the Securities Exchange of Thailand (SET) as this is very much in line with the present Government's policy." However, the formula for privatization, he explains, is still under study by the airline. "The fact that the management of Thai recognise that the airline's future growth is dependent on improving the present debt/ equity ratio, is behind much of the privatization discussions now going on," says Mr Chatrachai, admitting that this is a very positive move considering that the government, under the present existing economic constraints, cannot afford to inject any more capital into the stateowned enterprise.

"Thai has had to survive on its own strength," he says,

capitalization is 1.4 billion

to the fact that "we never sit still, but are always looking to make improvements," Mr Chatrachai admits, he welcomes privatization because it will forcibly inject more commercial thinking into the organization. "The airline business is a highly competitive one and the simution for the industry will not get better, it will only get worse. We will have to be more efficient. more innovative and more forward looking if we are to hold on to our present market advantages and expand on them," he says.

By February of next year, Thai International's aircraft fleet will number six advanced Boeing 747's, 16 Airbusses and 2 DC-10's, though "we are still looking for new aircraft capable of making longer distance direct flights," says Mr Charrachai.

> Bangkok: Gateway to the Far East

Thai's regional route network - "second to none" - has confirmed Bangkok's position as the "gateway to the Far East", he says, adding that it is an "advantage we intend to keep at all costs." The marketing strategy on its international routes that stretch from North America to Europe and south to

Australia, and for non stop direct flights to major destinations; "where the business is," he quips. "The days of 'Hopalong Cassidy' travelling making many intermediary the day. Thai's present stops on a long-distance flight

 are a thing of the past, whether you are a passenger travelling for business or pleasure.

In line with Thai International's "forward-looking". have been the airline's entry into such related, self-sustaining activities as: in-flight catering operations and services, wide-bodied aircraft maintenance, back-up transport services, and most notably, several hotel joint ventures. Whether there will be more, Mr Chatrachai says, he isn't sure right now, it will all depend on what proves to be "commercially viable", the key word today in the airline's operational planning. It is too early to say with

any assurance just what effect

Executive Vice-President/ President of Marketing, Thai

Airways International. the recent November devaluation of the Thai currency has had on Thai's current profitability picture, but according to early estimates, he believes it will be minimal, "With the 17.2 percent devaluation, it will automatically push our debts up, but revenue-wise we are running way above target.

"Our problem," he says, "is that by law we are not allowed to revalue our assets, so we are still carrying on the books, our big aircraft expenditures at the same old rate."

For fiscal year 1983/84, which ended on the 30th of September, Thai recorded its highest-ever pre-tax profit of 2,126.7 million baht (US\$93.3 million at the then existing exchange rates). Outstanding yield and revenue improvement was realized systemwide, with passenger traffic credited with earning the major share, 80 percent, 15 percent from cargo operations and 5 percent from other airline activities.

The number of passengers carried had increased by 5.2 percent over the previous fiscal year, to reach a total of 2,635,392. Total traffic carried measured in revenue ton-kilometres (RTK) was 1,195.4, an increase of 8.7 percent compared with 1982/83. Thai has a total staff of 9,623.

In reflecting on problems affecting the airline industry. Mr Chatrachai pointed to the increasing costs of aircraft. "Even though we have learned to "hedge" our purchases, opting in many cases for a lease-back arrangement and in a 'basket of currencies', we are still feeling current economic restraints. Privatization." he adds, "might be a welcome move in helping Thai to get around some of the problems.

To talk of merging both Thai Airways, the local carrier, and Thai International, Mr Chatrachai says: "in principle this has already been agreed to. We are just waiting for the 'green light', but the government has to give it."

European countries have asked for a selective capital increase. The Japanese are looking for a similar increase. This all ties in very closely with the admission of the People's Republic of China to the Bank. These things are all up in the air at the same time right now. But

all options remain open at this tíme. The taxpayers in the United States are less and less willing to pay for programs that they don't believe in. They have shown no inclination to cut funding from those things they do believe in. I think if the institutions are willing to alter their role so that the American taxpayers see that it's beneficial to remain in, you will see

SUPPORT Many of my colleagues say, especially on policy issues, Well, this is how we run our governments. This is how our people like to do things. It's of course our sovereign right to do that. Therefore if we want to spend the money that way we should be able to."

U.S. reaction to this is always very consistent: We completely recognise everyone's sovereign right to run their country any way that they wish, but the U.S. taxpayer also has the sovereign right not to pay for it. So that's the tradeoff that you have to make.

At the same time we recognise that there are foreign policy interests other than just the absolute transfer of resources and people working in these institutions are all trying for the same goals. So you don't want to be taking too strident a position. You do have to do some of these things incrementally.

Many of these changes we're looking for are so fundamental that we think we have to take a much harder Continued facing page

ASIAN DEVELOPMENT BANK

Vanuatu

The ASIAN DEVELOPMENT BANK is an international finance institution based in Manila, Philippines and established for the purpose of lending funds, promoting investments and providing technical assistance to developing countries and generally, for fostering economic growth in the Asian region. Its membership comprises forty-five countries, thirty-one of which are from the Asian region and fourteen from Western Europe and North America.

The Bank offers challenging opportunities to highly qualified and experienced professionals who seek employment on a career or fixed term basis. Applications are invited for the follow-

INVESTMENT OFFICER

*Effective 1 February 1985

The Investment Officer conducts security analysis capability and portfolio management including advisory services. Tasks cover promotion of Bank's equity investment program (venture capital) to DMC's private sector, identifying potential equity investments and assessing all its aspects and maintaining expert knowledge about venture capital operations and developments.

Candidates should have a university degree in banking, finance, accounting, commerce or economics. An advanced degree in the aforementioned fields and/or a professional qualification in public accountancy is preferred. Work experience must include at least five years of senior level professional assignments preferably in a developing country.

HEALTH SPECIALIST

The Health Specialist will be assigned to the Social Infrastructure Division to assist the Bank in its Health and Population sector activities. In addition to a basic medical qualification, the applicant should have a public health qualification (an alternative post-graduate qualification in

administration or economics would be acceptable provided that, in addition, the candidate had practical public health experience), with extensive experience in the health sector in developing countries, preferably those which are Bank members. More specifically, the candidate's experience should include health services administration: analysis of health sector information including services, management, manpower and epidemiological information, and the developments and implementation of program and projects designed to improve health sector services. The successful candidate should have superior communication skills in English, and be able to work in a team including non-medical specialists.

The successful candidate will be responsible for Project development work, including the determination of sectoral priorities in member countries, identification of suitable projects for Bank financing, and the processing of such projects with responsibility for all related documents. Additional responsibilities will include monitoring of Project implementation activities, and other such duties related to the above as may, from time to time, be required.

Fluency in written and spoken English is essential. Staff and their families will be based in Manila, Philippines, but the positions may involve international travel.

The positions offer competitive salaries paid in US Dollars normally free of tax, and an excellent

are. At that stage we would begin looking at projects where you can effectively leverage change in those policies. Now it can only be done concurrent with the proiect. It is always the case that the project has been chosen by some of the more insistent Board members. The technical assistance gets tacked on to the side of an existing project.

We'd like the technical assistance and definition of policy requirements made first. The project line would then be used for leverage or a 'sweetener' to bring about policy change; and make that assistance contingent on having the policy changes in progress - and begin tying not only loan effectiveness but loan disbursements to continued progress in the policy area. As you know, we believe it's the policy changes that drive the economic growth. Resource transfers that can come through a multilateral institution are so small that, if you don't have the policy changes, they won't matter. So they are only important insofar as they are the mechanism which you use to achieve policy reform."

On how the only good State Enterprise is one divested or defunct . . .

Q. If a state enterprise existed that was doing a better job than the private sector, would support for it be construed as a positive catalyst to growth?

"That's a pretty farfetched ssumption. I don't know where ever that's been the case or would be the case. What you'd have to look at

policies are in place, what can there is if there are other combe done to change them, petitors in the marketplace. In on before it would entertain determine what the barriers most cases where you see State-owned COLDOLATIONS they've also been granted monopolies. You almost never find that there is a stateowned corporation in comsector where the state-owned corporation has done better. Inherent inefficiencies and the political allocation of capital iust renders them impotent in the marketplace. So there is no state-owned provider of

> he funded in any case If there is no private sector alternative, it's usually due to one of two reasons: It's not a good use of resources, therefore the government shouldn't be in it either. Or the government has put up policy barriers to keep the private sector out of that activity if it does give a proper return to capital.

goods and services that should

On Replenishments of ADF Grant Content Loans . . .

"As it states in the budget, at this time we are not planning funding for any additional replenishments. It is currently under review. That review will consist of a hard look at whether the institutions that have concessional lending can alter the way that they run their programs, so as to warrant additional funding by U.S. taxpayers. At the same time, we're really tightening down on the budget.

At the meeting of the Board of Directors at which we discussed the ADF 5 paper

that the management of the Bank had brought forth, I read a long recitation of the kinds of policy changes that the United States would insist participating in ADF 5.

We're going to be looking for a hardening of the terms, to a point where we're at least charging an interest rate which is the equivalent of the petition with the private average inflation rate across the currencies that we have to deal in; possibly go into a floating rate on the loans to make sure that the grant element is constant for the life of the loan.

> We're also going to take a very hard look at the way funds are being used. An analysis by my staff indicates that in 1983-1984 all of the funds that went out under ADF were for state-owned enterprises. That is something we're certainly not going to entertain for the fifth replenishment. Another thing we think is

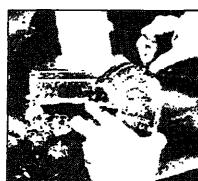

very important is the length of the replenishment. One of the problems we have in all of these institutions is that we're constantly negotiating replenishments and the management of these institutions have very little time to spend on policy changes. We want to get some changes of the rules in place and then have perhaps five years to evaluate them; at present they're four years.

If the policy changes are not forthcoming, you can expect to see the United States on the sidelines." Q. Should that occur, would

the United States also alter its traditional parity with Japan in the capital base of the ADB and reduce its presence altogether? "That's something which is still under consideration. Should

that contingency occur, we have to take a look at it at that time. As you know, some of the

to see absolute changes, One area where this has been so is in policy. Institutions such as the World Bank, ADF, all of them have put money out for state enterprise and have put out massive funding for the creation of state agencies, state bureaucracies, to manage the economies. With the monies that have come from institutions, we have created a generation of bureaucrats in many of the poorer countries, who have been tasked with economic decisionmaking on a day to day basis. What we've done as a result, is to create a climate in which a political skill is much more valuable a skill than an economic one, even when operating within the economic sphere. We want to see that turned around. We want to see funds being cut off that support these state planning agencies and state bureaucracies. We want to see those funds going into leveraging policy changes and, where appropriate, into helping out with the creation of a more vital free enterprise.

One of the things necessary for that is a removal of the restriction on state guarantees. So we can begin putting money into some private sector projects, without the state having to be the guarantor. So long as the state is the guarantor, it's very difficult to get a real free market allocation of capital and to remove the political controls.

That increases the risk to the Bank, but we're not in this business to be free of risk. The World Bank and ADB also loudly tout that they've never had a default, but that's because the governments have guaranteed the loans. Many of the projects have been disasters, and defaulted and never earned a nickel. What we're saving is that the institutions agreed to projects that didn't work, and governments had to use scarce resources to pay them back anyway. We believe the institutions can be reformed, adequately enough

look at this time. We think the for us to assume that extra

In one case, since I've been

here, we created a new stateowned enterprise with additional funds going out to bolster the bureaucracy to support that enterprise. That was definitely a mistake. We fund training components with many of our loans to go out and increase the capability of the bureaucracies to administer, rather than using the same funds to provide institutional changes to turn those enterprises over to the private sector. Right now the ADB is wasting huge sums of money on developing econometric models of South Asia. In one case even for India, which is not even a loan recipient. It is doing all sorts of studies out of the economics office which no one appears to have approved or agreed to. Yet we're putting resources into that when the Board is told time and time again that we don't have the expertise to evaluate private sector alternatives. That's something we think is definitely a mis-

allocation of resources.

There are many projects

implemented that are still in

plenty of trouble, from an economic return standpoint. Semi-annual reports on troubled projects show you more about implementation problems. We had a project early this year where the Bank was going for desalinization of some land in Pakistan, under an irrigation project. It turned out that the problems had been created by a previous ADB project. The previous project may never have shown up as a problem, since it's fully implemented. Whether it showed up as a failure by ruining all the land it was meant to help I don't know. With the kinds of changes the United States wants, you'd get a different review mechanism altogether. If the project to be used as policy leverage was to build a dam, and what you're hoping to get out of that is a freeing up of agricultural prices, the dam may be completed and providing water but the policy changes may have been put in place and then reversed. Our review of

the project would show it

the formal management review might show that they'd been very successful - the dam was completed, and is not falling apart.

On the Preference for Bilateral Aid Programs . . .

It is very accurate to say we have a preference for bilateral over multilateral aid programs. President Reagan has campaigned in two elections on that item. It's in the 1984 Republican Party platform. If you look at the distribution in our foreign aid programs you clearly see that, I think that's a recognition that the U.S. is looking for different policy changes than some of the others. We feel we get more leverage in many cases with the bilateral programs.

On the economic growth side of bilateral aid, I think you'll find the United States has not engaged in sied assistance to the extent that most of the others have. The closest tied assistance that we actually have is the export/ import bank program, but that has been shrinking in importance over the last few years, if you look at the disbursements and reduction of funds.

On ADB Efficiency...

at least one fundamental change?

Now in agricultural loans, say you're doing irrigation in a rice planting district. Did you get the market price of rice on the producer, wholesale and retail level freed up? We're not talking about getting the 'administered' price adjusted; that's not a policy change. On a fer-

hadn't worked out. Whereas tilizer project, we might look at whether we've gotten the government out of the fertilizer business.

> We believe making policy the criterion of loans will require a change in the composition of the staff of the Bank, and a massive change in the way the staff are compensated. We would like to see private sector orientation on the part of the staff: mavhe bringing in people from the corporate sector. We would also like to see remuneration of Bank staff changed, so that stuff working on loan implementation are rewarded for policy changes which they leverage and those working on loan funding receive some reward for the amount of cofinancing they bring in.

You can't impose your

In the United States ADR is considered the most efficient of the multilateral development banks. I'm sceptical of that. Remember that view is from a distance of 10,000 miles away. Traditionally, the Bank's efficiency has been measured as a ratio of the number of loans to the size of the staff (At present ADB has about a 1:1 ratio of loans to its 600 staff members). We would like to see policy changes within the countries to be a mark of success. Within each of the projects, have you achieved

views. You've got to get 50% of the vote to do anything. We have about 13%. We have no veto on what this Bank does, I guess if the U.S. feels strongly enough about policy changes that it's willing to cease to be a participant in their absence or reduce its participation, the other countries have to evaluate that for themselves. We're just saying this is the way we want to see things done.

You get suggestions that we may be pushing too hard from inside the Bank, but not necessarily inside the countries. In general I find the countries of the region far ahead of the ADB. One of the problems is that the ADB is intellectually fairly sterile. You don't find the ADB as a instance, President Fujioka

great generator of ideas. For created the Resource Center but you don't see the ideas developed there come into the project area at all. We want to bring ideas about privatization and so on that come up in roundtable discussions into the project stream. Many of the region's countries are already looking into privatization. Our effort is to bring the

Bank into lockstep with what the countries already want to The Bank is not providing

them the expertise to make the changes they need. Countries are looking at divestiture as a means of generating more capital and getting out of the drain on their current account budgets. We ought to be responding to that."

Management for **Stability**

Bangkok Bank Chairman says ADB has proven value

ooming global debt and rising protectionism, coupled with the economic uncertainties # brought on by fluctuating interest and exchange rates are some of the constraints troubling the ASEAN region's economic managers, says Bangkok Bank Chairman Dr. Amnuay Viravan, acknowledging that the new "Scenario" is one calling for management for stability rather than for growth.

"In the past, ASEAN's ability to finance its own growth was helped by the high rate of domestic savings and capital investment, but even this has been jeopardized by the current economic uncertainities." For the multilateral funding agencies, like the Asian Development Bank, he averts, the constraints are somewhat similar: "They have to pay more to get less."

ADB, he adds, has proven its value to the region, Thailand, as one of the major recipients, has put the money to good use, realizing great development benefits. But, generating resources for the development countries in the region is a problem that is

becoming more acute. This "opening up of new windows", providing financing for corporate business similar to what the World Bank's International Finance Corporation is doing - is a welcome move, says Dr. Amnuay, former Thai Finance Minister and now Executive Board Chairman of the largest bank in Southeast Asia, especially in view of the fact that many countries in the region are recognizing the necessity for privatization.

Privatization

As an advocate "privatization", a view he has held for sometime, Dr. Amnuay says; "It provides tangible evidence of the cooperative process engendered between the public and private sectors, somewhat like the 'fruits of the process'." In this, he says, Malaysia is taking the lead in the Region, though "the Thais are talking a lot about it."

"Privatization," as a con-

one objective: "increased efficiency and better utilization of the national resources." Adding that at the heart of the privatization process "is the belief that market systems of allocation, sharpened as they are by the forces of competition, are more efficient than non-market systems."

cept, he says, points to only

However, he counsels. efficiency and productivity should be the government's primary concern, not owner-Ship." And, between the public and private and public sectors - "between state control and free market competition - the ideal balance will vary for any given economy at any particular stage of its development,"

Region's largest Bank

As the region's largest and most powerful bank -Bangkok Bank is more than twice the size of its nearest Thai competitor: lending more then a third of all commercial credits and financing more than 45 per cent of the country's exports - Dr. Amnuay says it is deeply involved in the privatization process, both in terms of Dr. Amnuay Virsean, Executive Board Chairman, Bangkok Bank financial capacity, relative to

"The economic engine of the country is the private business sector and the development process can only be effective if it can be allied to private initiative and investment, and private production activities," says Dr. Amnuay, conceding that in lieu of the current global economic restraints, this is the "reality" of the situation in Asia today.

the industry, and in pro-

motional efforts.

Development-orientated approach

Bangkok Bank, he continues, will concentrate on taking a developmentorientated approach. "We have identified a number of areas where we can strongly advocate and mobilize resources for direct assistance." One area is export promotion in which the bank is already heavily involved in financing. A second area, "privatization", will require working closely with the government on project formulation as well as providing financial resources support, The third area is agriculture, says Dr. Amnuay: "better utilization of resources, not just expanding acreage: but more intensive agricultural development."

ASIAN DEVELOPMENT BANK YOUNG PROFESSIONALS PROGRAM

The ASIAN DEVELOPMENT BANK, an international finance organization, was established in 1966 to assist in the planning and financing of high priority projects in the developing countries of Asia and the South Pacific its stockholders are the governments of 45 countries of North America, Western Europe and the Asian Pacific region, its headquarters is in Manila,

The Bank's Young Professionals Program is designed to recruit a small number of exceptionally well-qualified young men and women to the professional staff. We are looking for graduates under 30 years of age who have superior academic credentials but who lack the minimum experience normally required for the Bank's professional staff

The work is tough and challenging. The Bank will give you that experience through structured work assignments, complemented by developmental activities and formal training programs. Your professional progress should lead you eventually to higher staff positions and to a challenging, rewarding and warled career.

The Bank's Young Professionals Program offers attractive salaries, normally free of tax in the Philippines, in addition to a broad range of benefits and allowances. To qualify, you must be a citizen of a member country of the Bank and have

* Either a Master's degree or its equivalent or a Bachelor's degree with at least two years

Proficiency in oral and written English.

Candidates should have advanced training in economics, finance, management, administra-tion or other fields relevant to the work of the Bank. Applicants with training in law, engineer-ing, operations research or computer systems may also be considered. Relevant work experience should be in areas such as banking, financial analysis of projects, planning and analysis of investments, budgets, accounting and country or sectoral planning. If you meet these requirements, please send in your application in English, quoting REF: YP86, with your curriculum vitae and copies of academic records and transcripts to:

REF: YP86 Head, Employment and Staff Relations, Personnel Division Asian Development Bank P.O. Box 789, Manila, Philippines

Applications for the 1986 intake in this Program should reach the Bank no later than 31 July 1985.

When Thai became airborne in 1960, our philosophy was simple. Only the best of people would run the airline. Only the best aircraft would make up the fleet.

And the standard of service would

be of the gracious, traditional kind. Thai's Royal Orchid Service took off and hasn't stopped climbing since. Our pioneering spirit has flourished, too, since we opened up Kathmandu and Bali in the late 1960's.

We were one of the first to establish a special business class.

We introduced the first non-stop flights to Europe. And established a north-west gateway to America. Served by an ever-expanding fleet of

magnificent 747Bs and wide-bodied A300s, Thai's route network now includes over 40 cities in 32 countries across four continents.

Many happy returns, many happy departures.

Stretching the ABM Treaty

The Reagan administration is taking some heat for saying it intends to stick within the terms of the 1972 anti-ballistic missile treaty as it continues its work on a missile defense system in space. From the left, it is accused of cynically planning to exploit technicalities and loopholes in the treaty to be able to say it is testing within its terms. From the right, it is faulted for failing simply to renounce the treaty, which, its critics maintain, was either flawed from the start or has been effectively

trashed by Moscow's violations of it. These grumbles are predictable: This is an administration that believes that the old arms control agreements undercut U.S. interests and that the Russians are untrustworthy negotiating partners. On this basis, President Reagan set out to search for a defense that would render obsolete not only nuclear weapons, as he has declared, but also the very need for negotiated arms agreements. Meanwhile, however, Mr. Reagan entered ambitious negotiations. So he was bound to have to answer to arms control's traditional friends and foes.

Traditional arms-controllers regard the ABM treaty as the high-water mark in the attempt by the two superpowers to master jointly their nuclear destinies. It helps to recall. however, that the treaty was never regarded as the be-all and end-all of American security. The text provided for research, the sure engine of change, and for amendments, review and even withdrawal. The two powers were serious about the treaty, but they made it warily. They wanted restraints, not a straitjacket.

It is no surprise, then, that there is heavy

pressure on the treaty now. It comes from sources well foreseen: technology and distrust. For years the two countries have been conducting research on space defense. They have

also accused each other of violations.

The matter of violations is key. The Kremlin can go so much further than any American administration in pressing beyond what trea-ties allow: It has no public or opposition to call it to account. This puts a special burden of policing the ABM treaty on Americans. Here it must be said that American conservatives. though they can go too far, have been attentive to issues of Soviet treaty compliance. The Pentagon is right to be troubled by the emergence of a double standard that forces Americans to be faithful to agreements that Russians compromise. The traditional friends of arms control need to be no less attentive. It could not fail to give the Kremlin extra incentive to satisfy American anxieties about, for instance, its Krasnovarsk radar - a large and troubling violation - if the traditional arms controllers took the lead in complaining about it.

Meanwhile, it is better that the Pentagon reshape its testing to stay inside the ABM treaty than that it test outside. Americans who think this is twisting words can go to the political arena, as they are. Russians who believe the Pentagon is stretching the ABM treaty can go to the consultative body set up to handle these issues. There they can raise questions about suspected violations - and they can address the questions about their own enterprises that are on Americans' minds.

— THE WASHINGTON POST.

Vietnam and Nicaragua

To the cry of "No More Vietnams," America has tied itself into knots over Nicaragua. The president wants a virtual declaration of war against the Sandinists - no more piecemeal humiliations by Soviet proxies. Congress, in a stunning demurral, says no more piecemeal investments of prestige in a war we are unwilling to send American boys to finish.

Some of the Vietnam echoes are evoked by the calendar. It is 20 years since American ground troops went into battle in Vietnam, and 10 years since their final ignominious withdrawal. But there is a simpler explanation for the present ambivalence: ignorance. Americans, even those in authority, are unsure about the conditions and stakes in Nicaragua. Where the facts seem so perplexing, how much easier to try the case by analogy.

For Congress, the overriding lesson of Vietnam is do less: Sign no blank checks for warmaking. It is not convinced that the Sandinists pose a threat justifying war. If they did, it sees no plausible plan for ousting them.

For the administration, the lesson is do more. Here it is, as rendered by Secretary of State George Shultz: "Broken promises. Communist dictatorship. Refugees. Widened Soviet influence, this time near our very borders. Here is your parallel between Vietnam and Central America." He says the failure in Vietnam not only betrayed the people of Indochina but led Congress to hobble the president's authority, thus emboldening the Russians and "destabilizing" the globe.

ings of history These rea or irrelevant. But they are woefully oversimplified. Americans did not need Vietnam to learn the nature of communism. They did not go into Vietnam to diminish Soviet influence but

what they ignorantly thought was China's. Nicaragua is closer than Vietnam, and arguably a more vivid U.S. interest. But it is in no sense a Soviet power. Precisely because it is nearby, the United States could quickly snuff out any real security threat. Nicaragua's Marxists may yearn to spread revolution, but their opportunities to do so depend more on American behavior than Soviet ambitions. Like Vietnam, Nicaragua may be too heavily armed for its size, but it has had much more reason to fear invasion.

The ultimate lessons of Vietnam should be evident. The United States will not effectively wage war unless it understands the reason for the pain. Even a hesitant resort to force creates uncontrollable imperatives. It soon requires exaggerating the stakes, then destroys the balance between ends and means and finally forecloses diplomacy and compromise. When America stands in peril, that price has to be paid. Where less than vital interests are at stake, the path away from force needs to be as clearly marked as the path in.

Mario Vargas Llosa, the Peruvian novelist, offered an astute appreciation of America's interests and dilemmas in Nicaragua in a report for the New York Times Magazine.

"The kind of massive, and bloody, military intervention that will be needed to overthrow the Sandinists will not result in a democracy.' he says. "Only a dictatorship can impose order in a country devastated by terrorism and civil war. To maintain the existing fragile freedoms under the present regime, the only choice for the opposition is to reach some kind of an agreement with the Sandinists. Although the regime has traveled far down the road toward totalitarianism, the challenges and difficulties it faces are an inducement to compromise."

That may be wrong. So may be the author's judgment that the Soviet Union has decided against paying the price of taking Nicaragua revolution looks a lot like Mexico's. But where are the comparably clear-eyed analyses by the U.S. government? Where are the lists of American demands, distinguishing between intolerable threats to U.S. security that justify war, and lesser interests to be sought with lesser sanctions or rewards?

The lesson of Vietnam is that, when in doubt, look a dozen times before leaping. Congress, which cannot have its own diplomacy, has not rejected a president's policy. In its justified confusion, it asks him to produce one.

- THE NEW YORK TIMES.

Other Opinion

The Cost of Import Curbs

Japan's latest and somewhat hazy new "market-opening" program, announced in re-sponse to continuing American charges of discriminatory trade practices, is likely to fall well short of placating an impatient Congress. As a result, the risk remains high that congressional frustration over the massive U.S. international trade deficit could be translated into some form of specific anti-Japan retaliation.
Senator John C. Danforth, Republican of

Missouri, a leader of the retaliatory forces, is demanding action to inflict "at least some economic pain" on Japan.

Steps to restrict Japanese imports or to raise their costs by imposing tariffs might indeed cut into the profits of Japanese producers and jeopardize the jobs of Japanese workers. But

U.S. consumers would end up paying for this exercise of pique, as prices of products that they want to buy rose and as the choices available to them declined. In addition, Japan could reduce its purchases of American goods.

- The Los Angeles Times. Shooting at 'Star Wars'

The fact that [Mikhail] Gorbachev is now prepared to propose deep cuts in Soviet missiles shows that (a) Mr. Reagan was right to launch the "star wars" program, because this is now the main pressure on the Soviet Union to negotiate seriously; but also (b) the Soviet leader is intelligent enough to make an offer that could split NATO down the middle.

— The Sunday Times (London).

FROM OUR APRIL 29 PAGES, 75 AND 50 YEARS AGO 1910: London to Manchester, by Air PARIS - Accustomed as the world has become to almost daily exploits with aeroplanes, the news that M. Paulhan had accomplished the journey from London to Manchester [on April 28) within the allotted twenty-four hours caused all men to marvel. Nothing quite so remarkable has so far been accomplished. This aeroplane was brought from France packed in cases. It was put together in eleven and a half hours, and at once started on its long journey, without preliminary trial. During the voyage the aviator had the nerve-racking experience of passing over densely populated country. By emerging successfully from these severe tests the flying machine affirms its right to be classed among the practical means of locomo-

1935: Did the Irish Discover America? PITTSBURGH - Dr. Vilhjalmur Stefansson, Arctic explorer, asserts that the Irish discovered America six or seven centuries before the voyage of Christopher Columbus in 1492. The explorer told the Pennsylvania Historical Association the Pope had documents to support this claim. "We'll probably never know the name of the man who discovered America," he added, "but we may be positive he was an Irishman." Stefansson described a paper writ-ten by an Irish monk in 820 A.D. telling of colonization of Iceland by the Irish and sa Vatican records showed that the Pope, in 1126, made Greenland a separate bishopric which

had an unbroken line of bishops until 1528. He

added that the Irish should be recorded as the

discoverers of the [North American] continent.

Eradicating African Famine: The Next Step

ROME—Fifteen years from the 21st century, in a world of artificial hearts, reusable spacecraft and high-speed computers, famine is killing thousands of Africans.

Africa's history has not recorded a catastrophe of this magnitude. In some drought-stricken areas, even the vultures have left. One in every five people in these countries is threatened by hunger. We must ask ourselves what went wrong in

Africa and how we can put it right.

Immediate relief of human misery is the first priority. This year, seven million tons of food aid is needed for 21 countries, more than double last year's amount. The response has been gener-ous: Pledges equal almost three-fourths of total need. We must urgently make up the difference. But food aid only eases today's hunger. It

cannot prevent tomorrow's starvation. We must help Africa to rebuild its ability to feed itself. Along with the bags of wheat we must unload fertilizer, pesticides and seeds. Unless we do. emergency aid will only perpetuate dependency. The United Nations Food and Agriculture

Organization has designed a \$108-million recovery program to boost African food production over the next three years in the hardest-hit countries. Many of the proposals, which were recently presented to donors at FAO headquarters in Rome, are aimed at getting supplies in place before the next planting.

This is not a charity operation. It gives the poorest peasant a fair chance to work for his daily meal, a shift from being a dependent to a producer. The problem is that most donor countries plan for long-term development or for food emergencies. Rehabilitation falls in between. It is

a budgetary orphan.

Recently the United States led the way in approving funds for recovery and rehabilitation projects in Africa. This is an encouraging step. I am urging other nations to follow suit. We can beat this crisis. Stage one is food relief. Stage two is recovery. But famine could reappear

if we do not press ahead with stage three — a new agenda for long-term development.

Today's food crisis should not blur the fact By Edouard Saouma

The writer is director-general of the UN Food and Agriculture Organization.

that African agriculture has been on a slow collision course with catastrophe. The recent three-year drought merely aggravated it.
For two decades, food production fell behind the world's fastest population growth. Over the

last 15 years. Africans have been eating less and less staple foods — 180 kilograms (396 pounds) per person a year in 1984 compared to 220 in

We must help Africa rebuild its ability to feed itself. Along with the wheat we must send

fertilizer, pesticides and seeds.

1970. Widespread poverty and malnutrition have dragged down life expectancy to an appallingly low level of 49 years. To prevent future famines, we must tackle the

root causes of today's crisis - technical, developmental, economic and political. There is a technical crisis because farming in

Africa is difficult and underdeveloped. Only onefourth of the land is suitable cropland, yet only a quarter of that is cultivated. Only 2 percent of arable land is irrigated, and irrigation development is likely to cost two to three times more than in Asia. Fertilizer use in Africa is less than one-tenth of that in the West.

Unfortunately, neither the "Green Revolu-tion" technology of Asia nor the capital-inten-sive methods of the West are appropriate. Africa needs research to produce drought-resistant, high-yield food crops and to reduce pests and diseases. It needs new farming practices to protect the fragile soil, fertilizer and irrigation.

The keys to the development crisis are popula-tion and government policies. Africa will speed

headlong to disaster unless it slows the pace of population growth. And governments must find the right trade-offs to develop other parts of the economy without punishing farmers. Farmers cannot be expected to produce surplus for the cities without a fair market price. In the develop-

ment agenda, agriculture must come first.

Economic and political crises are choking off reform. Agricultural exports only earn half of what they did in 1978. Countries are strangled by an \$8 billion debt-service burden that is projected to double over the next two years. Political

tension and war, in addition to hunger, have made one of every 200 Africans a refugee.

Forever famine? Yes — unless we plunge ahead with a new agenda for development. It must be led by Africans themselves. No file cabinet full of proposals can do it. Why can't the head of state also be the minister of agriculture? African ministers, in the Harare Declaration of 1984, resolved that the burden of agricultural development rests with them. But Africa cannot go it alone. The task is monumental.

go it alone. The task is monumental.

Donors should stop financing white elephants that do not work. More bilateral programs must be channeled into agricultural projects that reach the vital small producers. And it must be recognized that the future is trade. Trade brings in 50 times more than aid.

International and nongovernmental organizations must also contribute. The FAO now devotes almost half of its resources to food production in Africa, and its recovery projects are linked to long-term agricultural development. The road is long, and famine may again threat-

en. We must sharpen our ability to detect it and react. FAO's global information and early warning system succeeded in giving ample warning, but in the end, for Ethiopia, that was not enough. We are exploring ways to improve the system.

For all the scientific accomplishments of our century, it should also be within our ingenuity and resources to halt the recurring human torture of hunger. While we explore space, let us not forget our fellow men and women on Earth.

International Herald Tribune.

1985: A Year of Opportunity in Superpower Relations

GENEVA — East-West, and more particularly, Soviet-American interactions are visibly moving forward again. The first round of the new nuclear arms control talks has come to an end, albeit an end marked by some sharp words. A meeting between the leaders of the two countries appears likely. But the relationship is beset by many obstacles and uncertainties.

One senses, nonetheless, a growing realization that a way must be found for the two sides to meet half-way. Only thus can the nuclear arms race be curbed, gradually paving the way toward the ultimate elimination of nuclear weaponry. And progress in arms control would give the green light for progress in other fields.

Despite a recent chill in Soviet-American relations, the situation is not altogether bleak. The so-called Helsinki process seems to be slowly gathering strength: Progress has been made at the Conference on Securityand Confidence-Building Measures and Disarmament in Europe, held in Stockholm. Another CSCE gathering on human rights and human contacts s to be held next month in Ottawa. A "cultural forum" is to gather in Budapest in mid-October. There is also an upward trend in political contacts and consultation between individual signatories of the Helsinki Final Act. In the economic sphere, East-West

trade is expanding despite the many obstacles. But it remains low, particularly Soviet-American commercial exchanges. If a condition of relative trust and stability were achieved, there would be much wider scope for a mutually profitable expansion of

trade and cooperation. It is gratifying to record that under the auspices of the UN Economic Commission for Europe (whose members include the Soviet Union and the United States) effective regionwide cooperation in the control of cross-border air pollution is going forward - a remarkable, if littleknown East-West success story. Yet, such cooperative actions cannot in themselves end political and military

tensions between the two powers. In the sphere of Soviet-American links, many existing channels of communication and cooperation (several of which were established during the 1972 Nixon-Brezhnev summit) have gone virtually unused. There are now some signs of resumption of activity.

Contacts between academic institutions and also between influential American and Soviet personalities

WASHINGTON — Mikhail S. Gorbachev is wrong when he suggests that the United States is not

Moscow should be joining us in dealing with the here-and-now — re-ducing the large numbers of offensive

nuclear arms that exist on both sides

and exploring the potential benefits that can accrue from effective de-

fenses. We have already placed several attractive arms reduction proposals on the table.

As for strategic weapons, we of-fered in October 1983 to trade offen-

sive systems, which concern the Rus-

sians, for Soviet offensive systems,

which concern us. Specifically, we

By Evgeny Chossudovsky

are on the rise. Important high-level consultative meetings among parlia-mentarians headed by leading Soviet and American statesmen have recenttaken place in the two capitals. Would it not be sensible to hold such meetings periodically?

As to the possibility of a summit meeting, agreement on goals, scope, format, venue and timing will first have to be reached.

The last Soviet-American summit took place six years ago. This gap is abnormal. The Soviet Union has always sought regular, and preferably institutionalized, personal contacts between itself and other countries. A number of accords with Western countries on regular high-level consultations (e.g. with France and Canada) have proved valuable.

A new summit presumably would aim to give a boost to the Geneva arms control talks, but also would address the question of improving Soviet-American relations as a whole. The psychological and political effect of such a meeting could be considernormalization of relations.

A move toward normalization could be underpinned by making arrangements for ongoing consulta-tions; a Political Consultative Commission could usefully meet at least twice a year.

Ideas worthy of post-summit exploration include joint studies on a Soviet-American code of conduct that would set practical guidelines for international behavior (derived large-ly from existing treaties and accords); and, in the scientific field, consideration of carefully selected, but largescale cooperative research programs on such globally vital subjects as acid rain, cancer and fusion energy (see "To Fuel Summitry, Try Fusion Energy" by Flora Lewis, IHT, April 13).

What else could be done to lessen tension? The current year includes three notable anniversaries: the 40th anniversary of the end of World War II, the 40th anniversary of the entry into force of the United Nations Charter, and the 10th anniversary of the signing of the Helsinki Final Act.

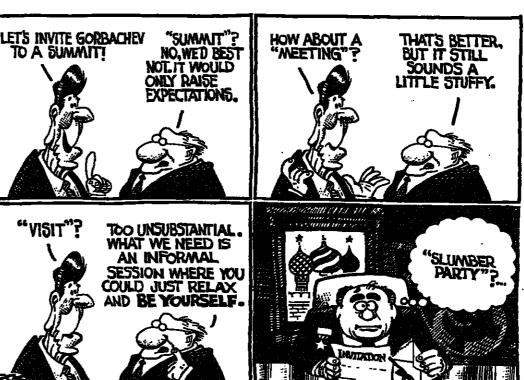

One would hope that Soviet and support their words with actions) that humanity shall never be subjected to a nuclear conflagration, nor to the horrors of another conventional world war. And the signatory states to the Helsinki Final Act should reit-

erate their commitment to détente. Nobody denies that the East and West blocs are and will continue to be divided by fundamental differences. But ideological differences must not be allowed to cause or perpetuate confrontation. Konstantin Chernenko, in one of

his last speeches, stressed that today's fundamental issue was not simply a choice between the Soviet Union and the United States but "a choice between survival [and] destruction of our civilization. The pivotal role of the Soviet-

American relationship in world affairs requires careful, but also imaginative and accommodating management by all concerned in a spirit of equal partnership.

The writer, a Soviet citizen, is a former senior official of the United Nations and now a fellow of the UN Institute for Training and Research. able, especially if concrete results. American statesmen would use these. He contributed this comment, which were achieved toward a progressive occasions to solemnly declare (and reflects only his own views, to the International Herald Tribune.

America, Mr. Gorbachev, Is Serious on Arms Control

By Edward L. Rowny

The writer is special adviser to President Reagan on arms control.

really looking for an agreement in the arms control negotiations in Geneva. The Soviet Union seems determined to prevent American research Pershing-2s if the Russians would on strategic defense — research of the sort the Russians themselves have long been conducting. In fact, our immediate goal at Geneva is to reach agree to an equal worldwide limit on warheads of their SS-20 and other intermediate-range missiles. In short, one desired outcome of the Geneva negotiations is mutual agreement on deep reductions of all nuclear arms in a way that strengthand verifiable reductions. Were we to ens deterrence and enhances stability. Our strategic defense research is a crucial part of that effort.

accept the latest Soviet proposal for an across-the-board moratorium on strategic, intermediate and space weapons, we would, to take only one example, be locking in the large advantages created by the Soviet de-ployment of more than 400 triple-warhead SS-20 missiles. This proposal would give the Russians an 8 to 1 advantage in intermediate-range warheads. It would divert the talks from the priority task of achieving a real reduction in offensive nuclear systems. And it would prevent

our research on defensive systems. One often hears the question, "Why should Moscow reduce its offensive weapons while we're pushing defense research?" First, we are not alone in efforts to explore the feasibility of ground- and space-based defense against ballistic missile attack. Long before President Reagan's Defense Initiative, the Soviet Union

ch in 1983 outlining the Strategic was engaged in a large-scale defense research program.

limit would apply to American violating the anti-ballistic missile ground-launched cruise missiles and treaty. Given the pattern of their many activities in strategic defense, we are concerned that they may be establishing the basis for a nationwide ballistic missile defense capability. Such a move, combined with an erosion in the offensive balance, would have severe consequences.

Finally, as both sides have ac-knowledged, research is not verifiable and hence not negotiable. But the Russians seem determined to contin-ue their own research while trying to stop ours. The freeze they propose on offensive forces would simply codify existing Soviet advantages.

We seek a more stable relationship. One way to achieve this, if our research bears fruit, would be through a greater reliance on defenses as a key component of deterrence. What we are trying to discover is whether, over time, we can move away from offensive retaliation as the sole basis for deterrence - away from "mutual assured destruction" and toward mutually assured security.

We cannot know for some eight to 10 years whether our research will pan out. Even if it does, these defensive systems must meet three demanding tests. First, survivability: They will need to be robust enough to withstand direct attack. Second, costeffectiveness: The deployment of de-Further, the Russians have been fense systems must, at the margin, be

cheaper than the offensive systems they would be defending against. An additional laser pulse, for example. must be cheaper than an additional missile or warhead. Third: The deployment of these defensive systems must at each stage contribute to an improvement in the stability of the overall strategic balance.

One argument we hear against our Strategic Defense Initiative is that it will induce the Russians to undertake a further offensive buildup so as to overwhelm the defense. Through discussions in Geneva, we hope to make clear to them that because we seek defensive systems that are cost-effective and stabilizing, an effort to over-whelm them will be impractical and

prohibitively expensive.
We should not allow Moscow's public attacks on our defense research to divert us: We must press ahead for sizable reductions in the offensive nuclear arms of both countries and for discussion of the future role of defense. The Russians say they share this goal. We hope they do, and that they will join us in the search for equitable, verifiable agreements. The New York Times

Is Reagan On a Path **Downward?**

By Tom Wicker

N EW YORK — Less than 100 days after his second inauguration, it is plausible to speculate that Ronald Reagan's power in Congress may have peaked and turned down. No exact method for measuring such things exists, and Mr. Reagan often has confounded prediction. Still:

 In the face of adamant congressional opposition, he has had to yield on military support for the insurgent army he had hoped would overthrow the Sandinist government in Nicara-gua — clearly "the bone in his throat." And it is unlikely that Congress will be more willing to finance the insurgents six months or a year from now, with the 1986 elections that much closer.

 Mr. Reagan and his aides have turned what ought to have been a minor triumph — his visit to the summit conference in Bonn — into a nightmare. The outrage of so many Americans may be no worse for him politically than the stunning evidence of so much bad planning, personal insensitivity and political ineptitude. A month ago. Mr. Reagan won the latest MX battle only by the narrowest of margins in the House of Representatives, and only by the deliberate claim — deeply resented by many Democratic and Republican members — that arms control talks might well fail if 21 MX missiles were not approved. The chances are slimto-none that Mr. Reagan will be able to talk Congress into financing more

of these costly weapons.

• Meanwhile, the president has milked all the benefits he can from sending a new arms negotiating team to new arms control talks in Geneva. Whatever brief euphonia that may have produced has laded swiftly into the dull prospect of long, hard, acrimonious negotiations that may prove fruitless for years to come.

• And now Mr. Reagan is involved

in a bruising struggle over the budget, in which he is attacking programs that benefit the middle class, advocating restrictions on Social Security cost-of-living increases, and insisting on more military spending than many members of Congress think necessary or affordable. Some of his strongest congressional supporters are telling him he cannot win his whole package of cuts and program eliminations; others say that unless the entire package is approved some of the parts most important to him will be defeated singly.

The setback on Nicaragua, the German debacle, and the tight squeeze on the MX also damage the president for the budget battle. Such evidence of vulnerability tends to be cumulative. Like sharks smelling blood, opponents sense it and close for the kill when a political leader's strength is fading or shows itself to have been overestimated — as Mr. Reagan's may have been after his landslide re-election.

The botch of the German trip and aid to the "contras" - together with Mr. Reagan's ever-wilder rhetoric on Nicaragua - also suggest that the revamped White House staff is not yet as alert and effective as was the old staff under the astute and experienced James A. Baker 3d, now secretary of the Treasury. And Mr. Reagan's foot-in-mouth disease is not belping; members of Congress, for example, are laughing at him for saying that it was "immoral" to schedule the vote on aid to the Nicaraguan insurgents as early as last week.

The White House may also have missed the opportunity to push through major lax reform in time to take credit for it in the 1986 campaign. Mr. Reagan has promised a bill in May but may not get it to Capitol Hill before June, then extensive hearings will be held in the House Ways and Means Committee, only after which will the Senate Finance Committee formally take up the measure. That makes action unlikely this year or next, since Congress will be reluctant to get into taxes in an election year.

That year is drawing ever nearer in political time. Its arithmetic favors the Democrats; only 12 of their Senate seats are at stake, but 22 Republican senators must face the voters—and the party holding the White House usually loses seats in a midterm election. With the economy slowing. Mr. Reagan's faltering per-formance and the approach of 1986 will stiffen congressional opposition; defeat in the budget battle would be

the most serious setback yet. Any confident report of the president's political demise, of course, would be greatly exaggerated. But when the bloom is off the rose, in politics as in nature, it is hard to restore its glory.

The New York Times.

LETTERS

Reagan on Nicaragua

In an opinion column by Anthony Lewis on Nicaragua (April 22), President Reagan is quoted as having said, "Somoza was bad, [but] the Sandinists are infinitely worse," Worse for whom? Nicaraguan peasants? The United Fruit Company?

ROLF HAMBURGER

Neuilly-sur-Seine, France. Income Under Ozal

Regarding "Turkey: The Generals Are Still There" (April 17);

As deputy prime minister under the military government and prime minister since 1983, Turgut Ozal has presided over a decline of per capital uncome from \$1,300 a year to an officially estimated \$987 per capital styear. The figures for per-capita income published by the Institute of State Statistics of Turkey are: \$1,346 in 1979: \$1,313 in 1980. \$1,308 in in 1979; \$1,313 in 1980; \$1,308 in 1981; \$1,168 in 1982; \$1,080 in 1983; \$987 (estimate for 1984).

love a freewheeling, pugnacious entrepreneur. Oddly, B.CAL matches that description too.

It has had to fight to survive, using its own cash and no one else's. It has had to live with some unglamorous routes and learn the hard way, clawing its existence and new image from its cheap-and-cheerful charter airline origins. In both aviation and business terms there is a distinct parallel with "Roots" — lots of hardship and tears over the years, linked with a doggedness and determination that has

brought success. British Caledonian takes the New York stage, the all-singing, all-dancing Big Apple of the civil aviation world, with an enviable reputation for service and performance that has been wrought over the years in the heat of battles to survive and to grow under tough

Almost for the first time, passengers have a choice of two British airlines to New York. Laker was hardly an alternative since he was primarily interested in the cheap end of the market. Now British Airways, TWA and Pan Am have a serious rival which will compete for the high-yield, high-profit First and Business Class passengers as well as those "down the

B.CAL has its own tour operators to feed in package tourists and will be pushing hard to grab its share of that market. But it is the full solvency.

Like the other transatlantic competitors,
B.CAL considers itself well off in the race to

first airlines to introduce an executive cabin, and its reputation on long-haul routes such as Los Angeles, Houston, Atlanta, Dallas and Hong Kong has been won on the quality of its First and Executive Classes. London-Houston in fact is an intriguing example of how the little guy can creep up and deliver a knock-out blow to a giant. Few gave

However, the point of the story is that is was not just the Brits who supported their own airline; more importantly, it was Texans who voted with their money. The oilmen shifted from Pan Am in droves, filling B.CAL's flights upfront to such an extent that the airline was

once again in the tougher New York market. Its experience in opening up other US cities is a help, and so too is its flair for promotions -I was in Atlanta once and you would have thought that the airline had bought the city centre for the amount of promotional activities it had going on. However, it will need also to convince sceptical New Yorkers that its

run into another of its wild and unpredictable storms. As a passenger, I'll just sit back and enjoy the spectacle.

THE CITY OF NEW YORK OFFICE OF THE MAYOR NEW YORK, N.Y. 10007

The City of New York has pleasure in officially welcoming British Caledonian Airways with the start of its daily service between John F. Kennedy Airport and London, Gatwick Airport on May 1. Your venture represents a further strengthening of the long established business and commercial links between our two great cities. On behalf of the City of New York, I wish you every success and prosperity for the future.

every success and prosperity for the future.

Cordially, St. Koch

'The world business community legitimately demands a distinct brand of airline service, tailored to its very special requirements. British Caledonian's pledge is that we will not only continue to give priority in providing the style and scope of servicing which the business traveller seeks, but we will also remain dedicated to continuous improvement.

The air waves across the North Atlantic have for years been as restless and tumultuous as the sea below, the skies glowing with false dawns full of hopes of fat profits, and storms that have brought casualties, none more spectacular than that of Freddie Laker.

Now there is another rough-and-tumble scene about to begin with British Caledonian becoming the fourth major carrier on the New York-London run from May 1.

Passengers will sit back and enjoy the benefits of promotional fares, special gimmicks and improved service as B.CAL's rivals react to the newcomer in time-honoured custom, while B.CAL itself will march from its hangar led no doubt by a Scottish pipe band, streaming banners and its famous if controversial "B.CAL Girls", each smiling as broadly as any model cover girl and revelling in the spotlight.

The passenger will also see, or be per-suaded to see, a David and Goliath situation. For B.CAL is justly called the underdog in British civil aviation - it is not merely the nation's No. 2 airline, but is way behind British Airways in size — and we know that the Brits love the underdog. Americans, in contrast,

fare economy passenger and, more importantly still, the frequent business traveller traffic that it will be after. This, after all, is what colours the bottom line black - or red. It is worth reflecting that even Laker, arch disciple of low fares, introduced a business class cabin in his wild thrashings just before in-

B.CAL much of a chance when it took on Pan Am. But before the American carrier had chance to notice, its British rival had walked away with the business, and Pan Am withdrew from the route, badly mauled.

obliged to increase the size of both First and Executive cabins - no doubt laughing all the way to the bank as it did so.

Now B.CAL has to turn on that expertise

service is better than the rest.

But, this is the Big One, the Big Apple, and once more B.CAL will stir up the transatlantic

B.CAL will be providing the first service from Gatwick to Kennedy. They will be offering an alternative British carrier; they will be offering a class of cabin service which has become famous, and those smiling Caledonian girls will cause the other major international airlines flying out of London to distribute more toothpaste to their own cabin crew and provide those basic services which are sometimes so difficult to obtain. It is a perfectly natural,

From: Gerald A. Fernback

President UFTAA & Chairman GBTA

As the reader will see from the above credit, as well as being a leading business travel agent from my own company, I am also the Chairman of the Guild of Business Travel Agents. This is the most professional grouping of travel agents in the United Kingdom, and fiftythree company members handle seventy-five percent of the business travel ticketed out of the U.K. To these members and their clients the introduction of the London-New York service by B.CAL is a major plus. B.CAL have always gone out of their way to look after the travelling businessman, and their schedules and services reflect this.

commercial characteristic that competition

improves service to the customer.

There have been very considerable changes over the last four years in the operating procedures of most of the international carriers; changes which have been forced upon them by the sliding economy around the world.

It is no secret that most airlines have had acute cash problems which have necessitated extensive re-structuring of management, reassignment of equipment and, in many instances, the purchase of new, expensive but more economic operating aircraft to meet the problems of the eighties and nineties. Fortunately most of the world's carriers have now completed, or virtually completed, this reorganisation and in a few instances are even coming back into recognisable profit. Airlines have beome more aware of the need to seek. listen to and observe the wishes of the travelling public. This has led to the opening of many new routes with substantial changes in the style of operation and the emergence of a recognised form of routing, known as the hub system.

Commerce does follow the airways and though the London to New York route is undeniably the most extensively served route in international aviation, nevertheless this additional service providing as it does so many more integral link-ups to so many parts of the world will serve to provide a stimulus for commerce; a stimulus whose ripples will spread far beyond the three thousand miles of the actual route.

At 35,000 feet, haute cuisine in high style

Travel Editor, House & Garden magazine

Airlines too often play safe with bland "international" foods as memorable as the "international" hotel room and made even less impressive by the biological fact that passengers lose 50% of taste appreciation in a pressurised jet.

One airline with true character in its meals and excellent presentation is British Caledonian. Stewardesses dressed in tartan kilts serve many Scottish dishes underlining the airline's ancestry. They are fortunate in having world-loved quality produce from Scotland - smoked and fresh salmon, seafood, Aberdeen Angus beef, venison, pheasant and other game, scones, shortbread and Dundee cake, kippers and marmalade for breakfast; not to mention whisky and Drambuie.

The tartan taste is highlighted above the clouds on special anniver-saries like Burns Night, complete with haggis, but the airline serves Scottish foods with lightness and less than traditional sauces. Scottish lobster comes with a Marie Rose cocktail sauce, salmon with cucumber salad in yoghurt dressing, baked sea trout with dill and lemon, quail paté en croute, turkey with haggis stuffing, and meals have begun with Highland clear game soup or cock-a-leekie (chicken and leek) served with cheese straws made with Orkney cheese.

Traditional British meals - breakfast and afternoon tea - are very popular with international passengers. Breakfast into London to allow maximum sleep may often be Continental style but on early morning business flights from London to Scotland and Europe there are full hot breakfasts, and from the States local ideas such as hash brown potatoes, hot poppyseed rolls, and Danish pastries are added. Flying routes to Hong Kong from the UK, middle-ofthe-night departures call for an "early morning refreshment" not quite breakfast, not as heavy as brunch or supper for time-confused stomachs, and imaginative ideas like chicken and mushroom pancakes, hot quiches, spring rolls for First Class and open sandwiches for Executive Class are served.

Newark or La Guardia.

In 1884 the first tea rooms were opened in Glasgow and 101 years later, British Caledonian serves traditional afternoon tea on transatlantic routes serving scones, shortbread and fruit cake. Into the States they often offer what is known in the UK as "high tea", originally served to walkers and travellers by farmers' wives. Certainly

"high" at 35,000 feet, it is satisfying enough for time-change passengers not to need dinner having arrived in the ** States. A current Farmhouse High Tea menu in First Class opens with Scottish beef and oyster pie with Dauphinoise potatoes, continues with salad and sour cream and chives dressing, and proceeds with hot scones, clotted cream and strawberry jam, tradi-tional Dundee cake with "selected English fancies" with tea or coffee. If a businessman wants to sleep or work through the main meal, the hostess can later assuage his hunger with such a meal.

Ideas are also taken from the cuisines of destinations served. On Hong Kong routes, First Class main courses parallel roast beef of Old Caledonia with Yorkshire pudding with barbecued loin of pork with ginger and soy sauce; in Executive Class, Sussex beef in old ale contrasts with Peking chicken with walnuts and peppers. Out of the States, Hawaiian shrimp cocktail, carrot cake and American ice cream are

The airline's admirable catering standards were early set by a Scottish lady, Katie Wilde, who was then the UK's only woman airline catering manager. Many of her family recipes were converted to airline use with Mrs. Wilde always flying herself with batches of new ideas to see how they reacted in flight. One of her creations

was breast of chicken with hazelnut sauce and still served is her way with potatoes (another great product from Scotland) layering them thinly with mushrooms flavoured with garlic and baked in cream and topped with a little cheese.

Marriott now caters for British Caledonian and reports the airline insists on perfect presentation. Plain white and gold Wedgewood bone china is used on royal blue linen. Senior stewardesses change to full length kilts and white, jabot-fronted blouses to serve dinner, and on African routes local girls wear traditional flowing cotton robes and turbans.

Though one of the regrettably few airlines to automatically offer iced water with a meal, British Caledonian's wine lists are among the air's most impressive. Each passenger is given the chance to study the selection at leisure, not just have a basket of bottles whisked past. Both

First and Executive Class passengers have individual booklets of wines and drinks available handed to them to study. First Class meals can be preceded by a choice of three sherries as well as cocktails and end with a 12-year-old Chivas Regal, the 12-year-old Glenlivet (malt whisky) or a Jack Daniels, and with the food comes Krug champagne, Chateau Kirwan Margaux claret; Gevry Chambertin, white burgundy, or Moselle, Rhine and Californian wines. And if malt whisky is not your liqueur then another fine Scottish habit is a port, in First a 20-year-old Sandeman is offered.

In the silver-covered Super Executive list sherries, old whiskies, malts, bourbon and ports are offered and among the wines, Louis Roederer champagne, beaujolais and chablis 'house wines' and a Muller Thurgau estate-bottled. Lamberhurst, an English wine.

In-flight selling: the future

To a businessman, an in-flight trolley represents two things. It means a blockage in the aisle, necessitating finding a longer route to the toilets. But even more important, it represents what businessmen call "slack capacity". Well, that may not be what they call it, but it's certainly what I call it.

Let me give you an example. My local filling station recently started selling potatoes by the sack, because a nearby farmer had noticed a large empty space just inside the door. The potatoes sold very well, so the filling station manager decided to sell fresh flowers as well. These too are selling well, so he has now expanded into groceries, glassware and household goods. The last time I spoke to him, he was thinking of phasing out the oil and petrol side of his business.

Now, for many years the trolleys that trundled up and down the aisles of aeroplanes dispensed nothing but meals and drinks, which is an unprofitable undertaking especially if they are given away free. Most of the time, anyway, the aisles were trolley-free. Eventually the airlines tumbled to the fact that they could also sell duty-free goods from trolleys, but sales have so far been modest. In filling station terms, they have just reached the

To fill this slack capacity, two paths are open to the airlines. They can adopt a more aggressive duty-free selling policy, by stressing that their goods are much cheaper than what you buy at the airport. "Cheaper than Schipjol", "To Hell with Heathrow" — this is the kind of crusading slogan they should adopt. They should also convert part of the plane to a small duty-free mart, in order to increase the variety of their stock, and to keep the aisles free for the second prong of expansion - franchising of trolley space.

What do I mean by this? I'll tell you what I mean by this. I mean hiring out trolley space to entre-preneurs who will pay well to be able to get at a large captive audience of businessmen, stockbrokers, lawyers, doctors, advertisers - all of whom would leap at the opportunity to turn a time-wasting long-distance flight into real business.

Imagine a stockbroker sitting for seven or eight hours, condemned to watch a Burt Reynolds movie that

even Burt Reynolds didn't want to make, when he could be moving up and down the plane with his tickertape trolley, selling shares while the stock markets of the world slept. Why, even one good transaction would make his flight worthwhile. Imagine a lawyer finding the one client on board who needs a lawyer like him, specialising in punitive damages for being sold dud stock by the broker ten rows down.

Doctors, too, hate being or planes waiting for the odd chance of a small child developing mumps. How much better for them to cruise up and down, looking for the ulcer or back strain that is looking for a doctor. And psychiatrists, too — why not? A couple of patients treated in-flight between London and New York would more than make up for the price of the flight. Antique dealers, real estate agents, computer salesmen — all should be encouraged to get up and hustle at 35,000 feet.

The advantages for the airlines are endless - increased revenue, easing of pressure on over-worked cabin crew, cancellation of unwanted movies, and so on. The businessmen who took out a franchise on aisle space would also be able to claim their ticket against tax - indeed, they would be able to claim their share of the plane as working premises and write it off against tax. Even the passengers would benefit, especially those who left Heathrow with a bottle of vodka and arrived in New York with an antique clock, an oil painting, a house in Florida and a miraculously cured migraine.

The only possible disadvantage would be that for seven hours it would be nearly impossible to get to the toilet. But all progress involves paying a price - in any case, it should not be beyond the wit of the airlines to invent a toilet trolley.

It only remains for some airline with vision to capitalise on my idea. They are welcome to it, at an agreed

Driusii Caledonian announce their businessman's

From May 1st, British Caledonian will be offering a unique door-todoor service on their New York-London route.

The service is for First and Super Executive passengers at both ends, and all the extras are included in the fare.

We'll pick you up from your home, hotel or office within a 40 mile radius of central Manhattan and drive you to JFK. (If you'd like to be picked up

from further afield, we'll be happy to do so for a small excess mileage charge.) Alternatively, you can take the helicopter direct to the airport from a choice of 4 departure points: central Manhattan, The World Trade Center,

At the other end, we'll drive you from London Gatwick to your destination, anywhere within a 40 mile radius of the airport.

Or we'll drop you off within 20 miles of the airport at Glasgow, Edinburgh, Manchester or Birmingham, just as long as you're connecting with our British Caledonian Commuter service.

Naturally, the transport will be in keeping with British Caledonian's reputation for comfort.

There'll be limousines for both First and Super Executive passengers to collect you in Manhattan.

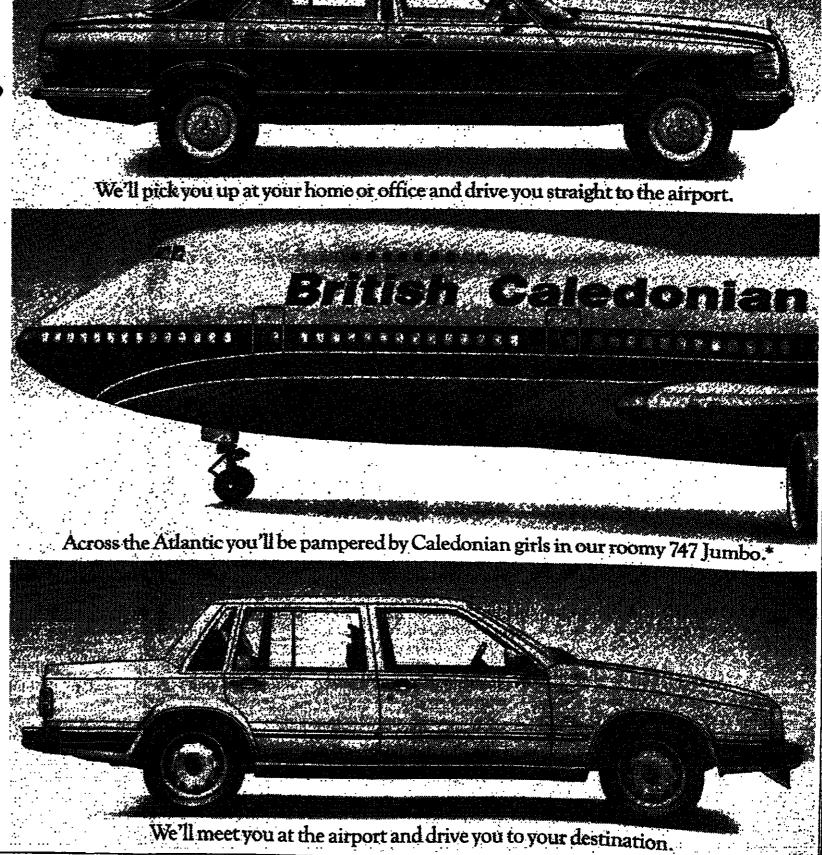

At the other end we'll lay on large saloons for Super Executive passengers, while if you're flying First Class you can look forward to the luxury of a chaffeur-driven limousine. British Caledonian's London flights depart daily from JFK at 20.00,

arriving at Gatwick at 07.40 the following day. Coming back, they depart daily at 11.30, arriving 14.10 - with the

same collection and delivery service. So next time your business takes you to New York and London, let

British Caledonian take you - door-to-door. See your travel agent or British Caledonian Sales Office for details.

> British (Caledonian) We never forget you have a choice.

B.CAL routes span four continents

With the start of services between With the start of services between London Gatwick and New York Kennedy, B.CAL becomes one of Europe's major North Atlantic carriers. B.CAL already has well established services to Houston. Dallas/Port Worth, Atlanta and Los

B.CAL's route network is centred on London Gatwick, the capital's most up-to-the-minute airport.
The airline has been designated by
the British Government as the UK
flag carrier to West and Central

Africa and to parts of North Africa.
Services to Africa cover routes to
Libya, Tunisia, The Gambia, Sierra
Leone, Liberia, Ivory Coast, Ghana, Gabon,

are those flying to Nigeria where both Lagos and Kano are served up to nine

Lagos and Kano are served up to nine times weekly in each direction.

B.CAL is also the British flag airline to Saudi Arabia and flies six times weekly to both Jeddah and Dhahran. The UK government has granted B.CAL a licence to fly to Riyadh and is negotiating rights for this additional service.

In the Middle East B.CAL flies daily to Dubai as part of its daily

daily to Dubai as part of its daily service between London and Hong Kong. B.CAL is currently seeking

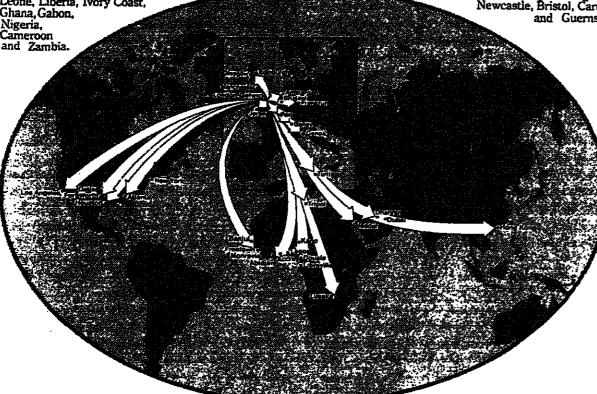

Government authority to begin a new non-stop service over the Soviet

non-stop service over the Soviet Union to Japan and Korea.
Within Europe B.CAL operates high frequency services on the prime routes, including those between London and Paris, Brussels, Amsterdam, Frankfurt, Geneva and Genoa and plans to start service soon to Milan. Associated commuter carriers offer services also to Antwerp and to Rotterdam.

B.CAL's UK domestic network is scheduled to provide easy connec-

scheduled to provide easy connec-tions at Gatwick. Services operate up to four times daily to and from Glasgow, Edinburgh, Manchester and Jersey. Commuter airlines feed into the B.CAL network from many other points, including Birmingham, Newcastle, Bristol, Cardiff

and Guernsey.

B.CAL pampers bottoms

what every airline wants. So it is surprising that so few have got it right when it comes to pampering the travelling executive's

As with all its plans for the London-New York route, B.CAL went out to its markets to find out what its. potential customers really wanted.

According to B.CAL Marketing Director Alan Deller, there was still great demand for the right kind of seat. "Some were just too wide, some were too narrow, and some were all right, but not spaced properly. The room around the seat is just as important as the seat," Deller says.

B.CAL set to work with a UK-based company, Flying Services, and used its research to design what it believes is the definitive seat — which will duly be put in the correct amount

Referred to technically as a "W" seat — B.CAL has branded it "Sky-Recliner" - it has been developed very closely by user and manufac-turer. "Our research and development manager talked directly to the people who were making it," says Deller.

Of course, with any seat, the proof of the padding is in the sitting — but B.CAL believes its Super Executive passengers will quickly recognise it as the most comfortable across the

GATWICK HILTON INTERNATIONAL

Beefeater and B.CAL travel overseas together

When glasses are raised in toast aboard B.CAL's first jet to JFK on May I, in celebration of the inaugural flight's successful take-off, you can be sure that more than a few will contain ice-chilled Beefeater martinis. No cocktail is more closely associated with the international jet set than the martini, composed largely of Beefeater London Dry Gin.

Beefeater London Dry Gin.

"Beefeater, by definition, is a drink that travels," says Edward Palmer, one of Beefeater's export directors. "Other firms manufacture many of their gins locally. All Beefeater is made in London and exported; we're the world's largest selling exported gin and have been selling fine gin for over 170 years,

which helps to explain why just a few days ago our firm won the Queen's Award for Export Achievement for an unprecedented fifth time. Since we last won it in 1976, our exports to

170 countries have trebled."
The brand's popularity makes it an international best-seller. A recent survey of the brands sold in duty free shops worldwide showed Beefeater

to be the only gin ranked in the top ten in distribution and sales. Climbing rapidly in sales is a second brand in the James Burrough plc stable: Burrough's English Vodka. In B.CAL First Class, this is the vodka served to passengers. Just as the Beefeater name and reputation as the Beteater hane and reputation spread worldwide through its identification with the beverage preferences of the travelling public, Burrough's English Vodka is expected to increase its market share through tie-ins with B.CAL and other leading carriers.

Hertz is B.CAL's car rental partner . . and would you like a

Hertz car when you get there?" is the sign-off question being asked by B.CAL's busy reservations staff these days, the result of a unique partnership between the airline and the world's leading car rental company.

By linking the two firms' reservation computers, it's possible for a B.CAL passenger to reserve a Hertz hire car in any of 5000 locations in over 130 countries. B.CAL's Marketing Director, Gordon Davidson, enthuses, "With its more than 400,000 vehicles available worldwide. Hertz offers our passengers a superb array of fly/drive opportunities. Hertz has the same kind of global reputation for quality and service as B.CAL, and our link-up enables us to provide a really signifi-

cant extra for passengers."

Hertz leads the industry in providing unique and valuable new services to its business traveller

customers, including:

• Membership in the No.1 Club which means swift, preferential service when taking out and dropping off a rental car and the elimination of detailed form-filling because all the driver's details are stored in the Mega Hertz computer for swift printout.

• Free, fast, computer printouts in seven languages of the swiftest route to the client's destination, complete with important phone numbers, indication of driving time and suggestions

of sights to see on the way.

• Mobile telephones installed in the luxury car end of the Hertz rental range so that busy executives need not lose touch.

Customer care packs including tissues, sewing kits, scented hand towels and other personal grooming

items passed out to renters in a number of countries.

• No. 1 Club lounges for renters at certain European airports, per-mitting them to wait for their planes in quiet and comfort.

Links with national railways in several countries so that hire carpickups and dropoffs can take place at well over 700 railroad stations.

"Hertz has always pioneered services and products for the business traveller," explains John Hambly, the firm's Vice President and General Manager for Europe. "We're delighted to be associated with B.CAL as it expands its routes across the Atlantic while Hertz, at the same time, expands the services it offers to its ever-growing inter-national clientele."

When British Caledonian start their new direct service to New York, Jetsave will be with them all the way. Every day.

BEING KNOWN AS A NUMBER CAN BE A VERY PERSONAL THING

Look, for example, at the individual registration number on the back label of your bottle of Beefeater Gin. If it were JF 1222146, it would tell you that your Beefeater was distilled Thursday, January 7, 1982, under the supervision of Thomas Bowman, Master Stillman, and that the distillation was approved personally by Mr. Norman Burrough, a direct descendant of our founder, before it was allowed to leave the distillery.

Does it help to know all this? Yes. That number is a vital part of Beefeater's quality control. Because the number is Mr. Bowman's personal signature. And Mr. Burrough's as well. And any artist is at his best when he has to sign his work.

WHERE THE WORLD IS AT HOME"

THE WORLD'S 4TH BUSIEST INTERNATIONAL AIRPORT IS GATWICK.

True 🗆 False 🗆

ANSWER: IRUE.

THE WORLD'S MOST SUCCESSFUL INTERNATIONAL AIRPORT SYSTEM

HEATHROW-GATWICK-STANSTED-GLASGOW-EDINBURGH-PRESTWICK-ABERDEEN

Hyaround ew orkina nunderbird torunder 45 per day.

The new Gatwick to New York flight starts on 1st May. So does the new Hertz flydrive from Kennedy Airport.

Hertz and British Caledonian have got together to arrange a Ford Thunderbird at the special rate of \$44.90 per day (a saving of some \$18).

Just pre-book through your travel agent or through B. Cal, and then you can take off as

soon as you touch down.

The Gatwick gateway

British Caledonian will offer the only service between New York's JFK Airport and London's Gatwick Airport — Britain's most modern — when it begins flights on May 1.

Gatwick, which started as a grass airfield 55 years ago, is the fourth busiest airport in the world for international travellers and last year handled 13.98 million passengers and 140,000 aircraft movements.

The start of the new B.CAL service will provide Gatwick with its 121st scheduled destination. Gatwick has repeatedly proved most popular of London's inter-national airports because of its easy-to-follow layout and its fast and

simple access to both central London and many other parts of Britain. Non-stop trains, specially designed and built, operate the

Gatwick Express between Gatwick and Victoria, right in the heart of London, every 15 minutes during the day and take only 30 minutes.

Ten helicopter flights in each direction daily provide fast links with London Heathrow Airport and a new motorway is nearing completion which will provide road links right round the outside of London for travellers to the North, West and East of the capital.

Gatwick has massive multi-storey and open-air car parks and is the nucleus of a network of coach services in all directions.

Chopper service

Heathrow Airlink helicopter service at the two airports to provide the fastest, easiest link possible.

Operated by a 26-seat Sikorsky S61 helicopter, the service provides ten flights every day in each direction. timed during morning and evening peak periods when most flights arrive and depart.

Passengers holding tickets on long-haul flights and transferring from one airport to the other can travel on Airlink free of charge.

Other passengers can buy tickets for the Airlink at the special Airlink desks at the two airports for the one-way fare of £22.

Hilton's at the heart of the hub

Horst Angelkotter, Chief Executive of the Gatwick Hilton International, despite an entire professional lifetime in the hotel and catering industry can claim the past three years as a truly unique experience in management

The Gatwick Hilton was completed in December 1981 and, it is believed, can claim to offer the only hotel facility at an airport of its kind in the entire world.

Its 333 rooms, extensive lobby restaurants, swimming pool and health club together with a wide range of other facilities and comforts are literally within walking distance, all under cover, from the central terminal at Gatwick.

London's second major airport,
Gatwick, is fast growing in importance for international business and
leisure travellers. A growing hubpoint for connecting long distance
flights stretching from Africa, and
the Far East to America's West Coast

... and beyond. Thus an opportunity to spend a night, or even day, between flights is a service superbly

provided by the Gatwick Hilton International, literally unrivalled by

Another feature to be immediately recognised as invaluable by the seasoned air traveller is the British Caledonian check-in desk within the lobby complex at the Gatwick Hilton. Thus you can shed yourself of your checked luggage straight from your room and stroll to the flight boarding point burdened only by your bag tags and boarding pass. Our reporter in a recent interview

with Mr. Angelkotter sought his reactions after three years of senior management at this unique hotel facility, as near to an "hotel in the sky" so far attempted. "In many ways a complete fulfilment of an hotelier's role in life," replied the Gatwick Hilton's top executive. "Having spent most of my profes-sional life at hotels around the world. I now appreciate that here at Gatwick we are providing rest, recreation and an opportunity to relax at the most essential time they are needed by the traveller." He added, "Air travel is

marvellous but when a break occurs we are able to offer all that is needed to make a journey truly comfortable and complete."

The Gatwick Hilton has enjoyed somewhat predictably, great success from the outset. To many thousands of the world's air travellers it is now a final travellers of the world's air travellers it is now a final travellers. familiar rendezvous and oasis; its banqueting facilities are in constant use also by a wide range of businesses and industries.

country house hotel

Only seven minutes from Gatwick Airport terminal by luxury shuttle coach, the Copthorne is B. CAL's own four-star, country house, inter-national hotel.

The Copthorne, nestling in over 100 acres of woodlands and built around a 16th century farmhouse, is unique as an airport hotel.

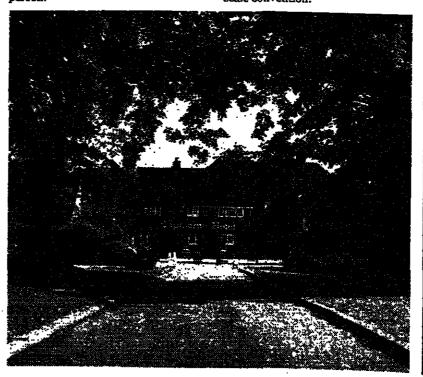

Built throughout in farmhouse

style on two floors only and with country garden outlooks, it is nevertheless of international standard and provides the standards and services required by the travelling business

Two radio-controlled courtesy coaches to run a shuttle service every 15 minutes between the ground level coach station at Gatwick and the hotel entrance.

But the Copthorne is more than just another - however unique airport hotel.

It has a fine classical cuisine restaurant, a competitively priced coffee shop with buffet service, several bars and a range of conference and function rooms suitable for every-thing from a board meeting to a full

B.CAL links

Caledonian has chosen to tie-up with Eastern Air Lines, one of America's biggest carriers and believes the B.CAL-Eastern link will prove a

Flights will initially arrive at the JFK International Arrivals Building and depart from the Eastern terminal. The US carrier is currently installing its own arrivals facilities; when these are finished in July. B.CAL believes it will have access to the best facilities at JFK.

B.CAL's Marketing Director. Alan Deller, says the terminal is a major boost for the whole service. "It has the shortest walk-time from the curb to the aircraft of any at JFK," he says.

he says.

Deller points out that it is also a very quiet and under-used terminal, providing a calm, hassle-free atmosphere, as well as some good connections with smaller carriers

B.CAL will have six check-in desks with its own corporate identity. So keen is Deller on the terminal and So keen is Delier on the terminal and its unique potential at JFK that he doesn't rule out "permanent investment" in it by B.CAL in the future.

Eastern's Ionosphere lounge, described as "excellent" by Delier, will be available to Super Executive customers.

B.CAL delivers the goods

B.CAL will be offering greater flexibility for cargo requirements when it introduces its Boeing 747 Combi on the Gatwick-New York

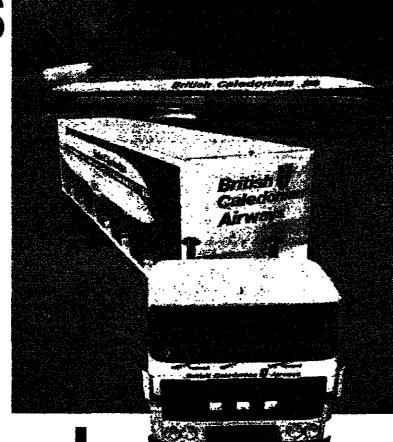

JFK route on June 1.

For the airline will be the only passenger carrier on the route offering main deck cargo space and the volume to carry outsize loads

which need not be split. The Combi's 123 ins. by 134 ins. freight door enables the aircraft to carry up to 25 tonnes of cargo in the rear of the main deck.

It will be the only British scheduled service aircraft capable of accommodating 10ft. high pallets. In addition a further 15 tonnes of cargo can be carried in the under-floor

David Coltman, B.CAL's Deputy Managing Director, said: "The new aircraft will strengthen dramatically B.CAL's position as a specialist cargo carrier and, with a weekly capacity of 560 tonnes, will enable us to develop on both sides of the Atlantic.

B.CAL and the business traveller

British Caledonian was pioneer of business class travel on the North Atlantic in 1978 when it introduced the Executive cabin on its London-Houston route. Rival carriers followed suit:

But B.CAL has since gone one better with the introduction of Super Executive, a self-contained cabin tailored for business travellers.

And the acquisition of a Boeing 747 for the New York route marks the introduction of a Sky Recliner seat designed specifically for the airline.

The seat features padded legrest, footrest and tilting seat cushion. Easy-to-operate, press-button con-trols ensure the highest standard of comfort for passengers. Seat reclineand legrest angle are controlled inde-pendently while there is also a simple legrest retract mechanism.

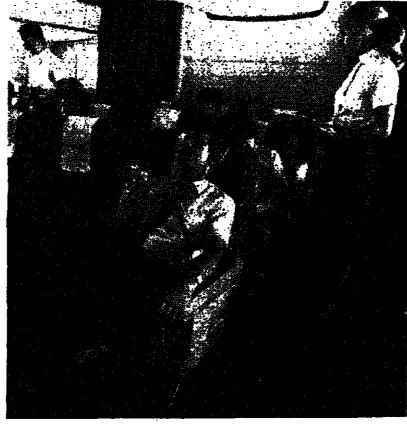

Emphasis is on space with just 2-2 seat configuration at a pitch of 40 inches. This allows larger central armrests with pull-out mini-tables.

B.CAL's Boeing 747 includes two Super Executive cabins with 16 seats deck. Each cabin features a distinctive decor in shades of brown and

Among the special amenities are linen headrests and cushions and large cellular blankets.

Passengers are offered a choice of meals, served on china. All drinks are free with a comprehensive selection of wines and spirits.

Super Executive passengers also receive toilet packs containing toothbrush and paste, shoe horn, eye mask, slippers and comb.

Free in-flight entertainment can be enjoyed with the aid of luxury padded, electronic headsets. There is also a wide range of newspapers and

Super Executive also allows advance seat selection at time of reservation, separate check-in and priority disembarkment. Passengers have access to Eastern Airlines' Ionosphere lounge at JFK.

Take the train to the plane

British Caledonian's unique Central London Air Terminal, right in the centre of Victoria Station, enables passengers to check-in and hand over their baggage before taking the Gatwick Express to the airport.

The terminal is close to the Gatwick Express departure platforms and has its own bridge linking it

It is only a few minutes walk from the London Underground station, from the bus stops for Victoria Station and from the taxi drop-off points.

B. CAL's Central London Air Ter-

minal provides passengers with a comprehensive flight check-in facility:

· A complete check-in service up to 12 hours before aircraft departure on the day of a flight leaves passengers free of their baggage until they reach their final destination. · Reservations and ticket desks, seat selection facilities and boarding

cards are available from CLAT requiring no further check-in formalities at Gatwick to contend with.

 Up-to-the-minute flight information, a licensed bar for hot and cold snacks, beverages and drinks and a comfortable departure lounge area are among other facilities offered.

Passengers are escorted to their train via a private walkway to the plat-form by uniformed B.CAL staff.

CLAT also features, in common with the other major route airports on the B.CAL system, a private Clans-man Lounge for First Class and British Caledonian Chieftain Club

Gatwick Express service to Gatwick, with departures every 15 minutes each day during the peak period, CLAT offers business travellers a

unique passenger service.
Gatwick Express provides a nonstop service between Gatwick and Victoria every day between 05.30 and

At night services are operated by regular trains and run every hour. Gatwick Express journey time is only 30 minutes, 12 minutes faster than the original time using normal

trains. The Gatwick Express was specially designed and produced for the airport link and offers adjustable seats, air-conditioned coaches and ample space for bags and cases.

For arriving passengers at Gatwick, British Rail has its own enquiry desk in the arrivals hall and supplies tickets for both Gatwick Express and its services to anywhere

More than just an airline

British Caledonian Airways is a member of one of the UK's leading travel, tourism and engineering groups, the Caledonian Aviation Group plc, which last year recorded a turnover of more than £526 million. British Caledonian itself earned

almost £414 million and carried 2.1 million passengers. Its overall revenue load factor was 63.9 per cent. Other members of the Group

· CHM Hotels which owns or manages 17 properties in Europe, Africa and the Caribbean, with a total of 3,550 rooms and is currently handling several new hotel developments in Britain.

 Jetsave is a British tour operator which specialises in holidays to North America but also has growing programmes within Europe and to the Far East. This year it will carry more than 100,000 passengers.

British Caledonian Travel

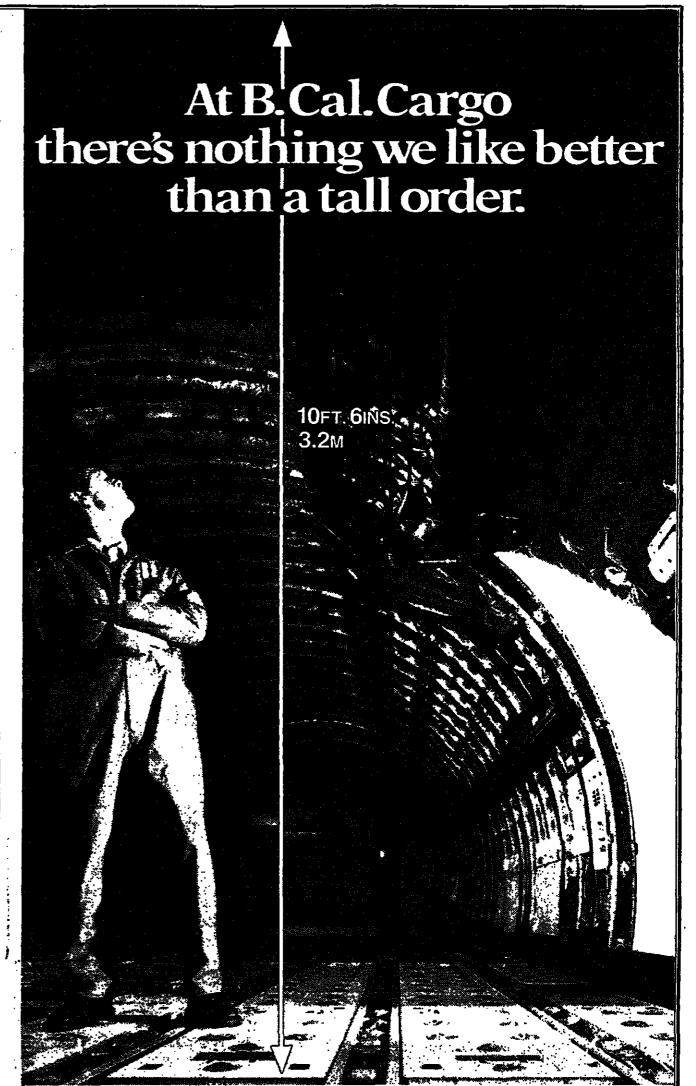

Holdings operates an inclusive tour firm, Blue Sky Holidays, which concentrates on holidays in Europe and North Africa and this year will carry some 200,000 passengers, and Blue Sky Travel which has 25 retail travel agencies in England.

 Caledonian Airmotive is a high-tech engineering firm based at Prestwick Airport, Glasgow, which has one of the most advanced aeroengine test plants in the world and last year was given a Queen's Award for Export Achievement.

 British Caledonian Helicopters is based at Aberdeen, Scotland, and concentrates on support flying for the

North Sea offshore oil industry.

British Caledonian Aircraft Trading provides specialist services for airlines in the sale and purchase of aircraft and in the provision of consultancy contracts.

From June 1st British Caledonian will be flying cargo at a new height...10ft.6ins.

That's the height of Cargo we can accommodate on the upper deck of our new Boeing 747 Combi. It's a specially equipped aircraft that divides the passenger deck to accommodate cargo.

To keep up with the future demands of the air cargo industry we are thinking big, so our first 747 Combi starts from June 1st, flying seven days a week to New York's JFK airport

By thinking big we're adding extra capacity, extra height and extra tonnes. In fact any container or pallet in the cargo industry can be accommodated in our Combi, as well as large volume shipments such as vehicles, boats, helicopters, even heavy machinery.

Thinking big hasn't made us big-headed. But we are proud to say that there's one thing which sets us apart from other airlines, and that's our people. Their dedication, care and commitment have made B.Cal Cargo one of the world's leading carriers.

So when you give us a tall order we welcome the challenge, because we know our people come up to the mark.

B.Cal Cargo, with our new Combi and the best people, we've got a big future.

Our people make us better

Budding Rally Is Shattered By Rate Rise, Volcker Talk

By CARL GEWIRTZ

ARIS - A rise in short-term dollar interest rates last week coupled with tough talk from Paul A. Volcker, the chairman of the Federal Reserve Board, about the need to keep U.S. interest rates high shattered a budding rally in the Eurobond market.

The rise in rates was hardly sharp -- 1/4-point in one-month Eurodollars to 5/16-point in one-year funds. But it was enough to erase almost half of the dollar's 14-percent decline against the Deutsche mark seen in the previous seven weeks, leaving speculators, investors and borrowers in stunned confusion over future trends in the bond and foreign-exchange markets.

Operators in both markets had read the sharp slowdown in

first-quarter U.S. economic growth as a signal for lower interest rates and, as a result, a declining dollar.

But Mr. Volcker's comments in effect alerted the markets that

slower-than-expected growth in one quarter does not automatic-

ally mean a marked downward revision in forecast growth for the year. The rate of expansion this year has been expected to slow to about 3.4 percent from the 6.8 percent recorded in 1984 and international experts confirmed last week that the disappointing first-quarter figures were no cause to revise their projections for

In addition, officials are cautioning against expecting a sharp flare-up in U.S. infla-tion when the dollar does start to decline. Very low rates of inflation in West Germany, Switzerland and Japan and declining rates in

Britain and France in face of very sharp currency depreciations against the dollar are now being interpreted to mean that exchange-rate changes have less of

an impact on domestic inflation rates than in the 1970s, primarily because monetary policy is more firmly linked to money supply

All this means that U.S. interest rates may not be about to plummet and that a decline in the dollar may well take the shape of the "soft landing" officials hope for rather than the havocmaking collapse speculators are prepared for.

It also means investors have stopped rushing to buy non-dollar securities in the expectation of big currency gains and have stopped nibbling at dollar bonds on expectations of capital gains if interest rates fell. Light demand for paper has never stopped issuers from trying to force the market, but there was little of that last week. Borrowers themselves are not sure whether cheaper financing may not become available when a clearer picture of economic trends comes into focus after this week's scheduled reports from Washington on housing starts, factory orders and leading economic indicators.

Also weighing on the market is this week's announcement by the Treasury on its quarterly refinancing plans and the outcome of the delayed Senate vote on President Ronald Reagan's budgetcutting proposal.

The few issuers who dared to tap the dollar market fared poorly. Anheuser-Busch's \$100 million of eight-year bonds at par bearing a coupon of 11% percent and Tokai Asia's \$100 million of 10-year bonds at 11½ percent were shunned. Bankers noted that clients who want dollar paper can find much better yields in the

Nestle Holdings, the U.S. affiliate of the Swiss company, offered \$100 million of 9%-percent, three-year notes, which may be extended to eight years, and did better thanks to the magic of the name and the scarcity value of its paper. Its first dollar issue (same amount, same terms) was made in February.

note market also languished, with only one small new issue of \$30 million for Transamerica bearing a coupon %-point over the six-month London interbank offered rate.

The FRN market is weighed down by large amounts of unsold paper, particularly issues using the mismatch formula of monthly fixing of coupons based on the six-month rate. At the height of its popularity, the formula allowed banks and other institutional investors to pick up an additional 144 percentage points of income due to the difference between their one-month financing costs and the six-month coupon rate.

But that spread has collapsed. Early this month the one- and six-month rates were identical. The market has become a bit more comfortable now that the spread has widened to half a point, but (Continued on Page 17, Col. 1)

Venezuela had made clear that it would supply sufficient quantities of crude to enable the refinery to operate at a profit, he said. But at the same time, the Vene-zuelan government had ruled out

buying a shareholding in the refinery, which had a loss of \$62 million

Remors

CARACAS — Venezuela and the Netherlands have agreed tentatively on a formula to save Royal

Dutch/Shell Group's 320,000 bar-

rel-a-day refinery on the Dutch Ca-ribbean island of Curação, accord-

ing to the Dutch special envoy,

Emile van Lennep.
The formula is intended to per-

suade Shell to drop its demand that the Netherlands Antilles govern-

ment buy a majority share in the refinery, he said Sunday after three days of talks with Venezuelan lead-

The two sides had agreed to set

up a mechanism for regular consul-

tations on the economy of the

This would give Shell the politi-cal backing of Caracas and The

Hague to continue operating its re-finery on the island, Mr. van Len-

He said some form of Venezue-

lan government involvement with

the Curação refinery was essential to persuade Shell to keep it open.

Netherlands Antilles.

Curação's economy for more than 60 years, Mr. van Lennep said. He planned to fly to Curação for more talks with the Netherlands

which has been the main pillar of

Antilles government.

He and the Venezuelan foreign minister, Simon Alberto Consalvi, said the proposed regular consultations between Caracas and The Hague would deal with diversifying the Netherlands Antilles's economy as well as matters related purely to the oil refinery.
For its part, the Netherlands An-

tilles government would have to modify taxation of the refinery and agree to a cut in its work force and abor costs if it is to remain open,

This was a reference to Shell's demands for a 25-percent cut in its work force of 2,000, wage reduc-tions and the abolition of a minimum annual tax of \$16 million on the refinery's operations.

■ Ecuador Clears Expansion

Ecuador's state oil company, Cepe, has approved a contract with Japan's Sumitomo-Chiyoda con-Esmeraldas refinery, Reuters reported Saturday from Quito.

said that the contract for the \$120- of the economies.

Chiyoda Chemical Engineering and the United States has a growing percent of the project, which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise Esmeraldas's output to 90,000 barrels a day from the current of the project which would raise the project

Plan Set To Rescue Refinery Big Curação Unit Of Shell at Stake

An Esso refinery in Italy, where First Arabian is banking on an industry comeback.

Arab Oilmen Take Gamble in Italy First Arabian Corp. Pins Its Hopes on Deregulation

By Bob Hagerty International Herald Tribun PARIS — Pumping gasoline in Italy is not everyone's idea of a

particularly attractive business, Losses on oil refining and marketing have been so stagger-ing over the past decade that a half-dozen international oil companies have pulled out of the market. Despite the exodus, Italian refiners still operate at only 50 to 55 percent of capacity. As for the government's price-control system, the head of the industry association, Unione Petrolifera, last year described it as

But First Arabian Corp., a Luxembourg-registered holding company owned by Arab investors, is betting on a turnaround. In 1983, the company agreed to acquire the Italian refining interests and gasoline stations of Standard Oil Co. (Indiana), now Amoco Corp., for an estimated \$275 million. Last February, First Arabian made a similar agreement with Chevron Corp.

Assuming the Chevron sale goes through, First Arabian's Tamoil Italia unit will own 2,500 gasoline stations and control about 8 percent of the Italian oilproducts market, making it No. 3

"If one can take the long haul it's just fairly solid business sense," Matthew Steckel, a First Arabian director, said in a recent interview in Paris. Mr. Steckel, a New Yorker who serves as the right-hand man to First Arabian's Lebanese chairman, Roger E. Tamraz, argued that the industry is starting to recover and that there is still room for costcutting.

Mr. Tamraz predicted that the Italian government would soon (Continued on Page 21, Col. 1)

Japanese Quotas **Are Said to Favor Small Car Firms**

By Susan Chira New York Tunes Service

TOKYO — Japanese automakers with ties to U.S. car companies appear to have been favored in the government's alloument of quotas for export of vehicles to the United States, according to industry

The new limits, not yet officially published, generally are at the ex-pense of the largest Japanese auto-makers, auto-industry officials

According to these sources, General Motors Corp. and Chrysler Corp. will be able to more than double the number of cars they import from their Japanese affiliates. These affiliates are Isuzu Motors. tors Ltd. and Suzuki Motor Co., for GM, and Mitsubishi Motors Corp., which is Chrysler's, Isuzu and Su-zuki also sell cars in the United States under their own names.

Ford Motor Co. does not currently import from its Japanese affiliate, Mazda Motor Corp., which also sells cars under its own name. GM and Chrysler had both asked for large increases in the cars they import and market under their

Makoto Kuroda, director general of the international trade policy bureau of the Japanese Ministry of international Trade and Industry, said that GM and Chrysler would

receive a total of about 314,000 cars from Japan this year, more than twice the 134,000 they receive now. The companies had requested a to-tal of 534,000 cars.

These "captive exports" make up about 40 percent of the increase in Japan's exports to the United States, Mr. Kuroda said. In Detroit, GM, Chrysler and Ford declined to comment, saying

they were awaiting official word. A spokesman for Chrysler said it ex-pected to receive a letter from the Japanese trade ministry notifying it of the aflotment.

Neither ministry officials nor

automakers would release a breakdown of the number of exports for each automaker. Press reports quoting approximate figures from anonymous sources, however, indicated that the largest automakers received the smallest increases.

Although specific estimates varied, most reports put the increase for Toyota Motor Corp. at 11.8 percent; Nissan Motor Co., 11.7 percent; Honda Motor Co., 14.1 percent; Mazda, 30.3 percent; Mitsubishi, 69.6 percent; Fuji, 39 percent; Isuzu, 142 percent, and Suzuki, 211.8 percent.

Toyota would therefore be able

to export about 617,000 cars, up from 551,790 in 1984; Nissan, about 545,000, up from 487,040; Honda, about 425,000, up from 372,340; Mazda, about 226,000, up from 173,470; Mitsubishi, about 208,000, up from 122,610; Fuji, about 106,000, up from 76,250; Isuzu, about 120,000, up from 49,500, and Suzuki, about 53,000, up from 17,000.

Last month, the trade ministry announced that it would hold total Japanese car exports to the United States to about 2.3 million cars, an increase of 24.3 percent, or 450,000 vehicles. Essentially the quotas only affect cars; truck shipments are not limited and Japanese shipments of mini-vans, while included under the car quotas, are small.

Because President Ronald Reagan decided not to press Japan to continue its quotas on auto exports, the trade ministry believed that holding the total to 2.3 million cars would avert trade friction. In-(Continued on Page 17, Col. 2)

U.S. Tool Makers Helped By Surge in Domestic Orders

NEW YORK - The U.S. machine-tool industry, continuing a gradual comeback from several disastrous years, reported healthy gains in new orders and shipments

The National Machine Tool Builders' Association said that net new orders in March for Americanmade metal-cutting and metal-forming tools climbed 17.6 percent over February's orders, to \$279.3 million. Orders surged 34 percent over March, 1984.

Shipments of tools increased 36.9 percent from February, to \$227.65 million, the trade group said. That represented a jump of 20.3 percent from a year ago. Analysts said the gains were encouraging, but noted that the in-dustry is still far below its pre-recession sales levels and that it

continues to lose ground to im-Christine Chien, an analyst at Prudential-Bache Securities, pro-jected that orders this year would surge to about \$3.75 billion from their 1984 level of \$2.9 billion. That would still be far below 1979, the peak year for the industry when new orders totaled \$5.6 billion.

"The industry was at its lowest point ever, so anything now is go-ing to look good," said James A. Gray, president of the industry association. Mr. Gray reiterated the industry's call for a temporary gov-ernment-imposed quota to limit

imports to 17.5 percent of United States consumption.

Imports, primarily from Japan, held 41.6 percent of the market for metal-cutting tools at the end of 1984. Mr. Gray said the import share was even higher in other seg-

"The American market for ma-chine tools is good," Mr. Gray said. "The question is where those machines are going to be built."

Analysts said United States companies were suffering from the effects of a strong dollar and more efficient production of machine tools by the Japanese.

Mr. Gray said the Japanese were

gaining a crucial advantage in two types of tools — known as numeri-cally controlled machining centers and numerically controlled turning machines - that are integral parts of modern, automated factories. "What they want to do is drive out of business the American companies that are making those prod-

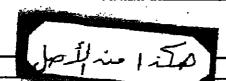

ucts," he said. The improvement in March was most pronounced in orders from and shipments to domestic manufacturers, the group said.

Orders from domestic companies for metal-cutting tools, which constitute the majority of the in-dustry's sales, rose 36.9 percent from their February level and 53.7 percent from their year-ago figure. hipments of metal-cutting tools to domestic companies climbed 41.8 percent from February and 24.9 percent from a year ago.

notes are.

The non-dollar sectors of the bond market, although depressed by the dollar's 5.8-percent recovery last week, should get a speculative boost this week with the expected inauguration of zero-coupon bonds denominated in Deutsche marks. Austria is rumored to be planning the first such issue at the start of the

Like the Dow Chemical issue announced late last week, for a nominai £300 million, the low purchase price — in Dow's case 29 percent of face value — in effect offers a very inexpensive way to speculate on the appreciation of the currency as well as a decline in interest rates. Even if sterling interest rates subsequently rise, as they started to late last week, foreign investors could still reap a profit.

Polish Debt Talks Said to Be Stalled

PARIS -- Poland's insistence on getting new credits for its ailing economy has led to deadlock at talks in Paris aimed at giving it more time to repay its debts to the West, according to Polish sources.

A Polish delegation met creditor countries at the informal Paris Club creditors' group Saturday with the aim of signing an accord to reschedule about \$12 billion in ar-rears on official debt repayments. The payments are due between 1982 and 1984 on debts guaranteed

by the 17 Western governments. But the sources said that last week's talks, like similar talks in March, had been stalled.

Cools Investor Enthusiasm

NEW YORK — U.S. credit mar-kets closed slightly higher last week but remained sharply below the levels of a week earlier.

There's disappointment about the Fed and a profound lack of investor enthusiasm," a trader said.

U.S. CREDIT MARKETS

Thursday's release of U.S. bank discount window borrowing data showing a rise in the latest week helped dash speculation that the Fed would ease policy. That lessened investor interest.

Treasury bill rates fell three to five basis points Friday but were up two to seven basis points from a week ago. Prices of coupon issues edged up 1/32 to 1/4 point from Thursday and eased 12 to 13 points over the week.

The benchmark 11¼-percent Treasury bonds of 2015 closed at 98-17/32. That reflected a 7/32 rise from Thursday's finish but was 1 % points beneath last Friday's close.

The Federal Reserve Board on Thursday helped quash hopes for a near-term reduction in the 8-percent discount rate by announcing that U.S. bank discount window borrowings, less extended credits, averaged \$449 million a day in the week ended Wednesday. That was up from \$335 million in the prior

Analysts said the rise in borrowings probably was not entirely planned by the Fed. However, they added that the data still suggested that the Fed has no intention of

easing policy soon. The federal funds rate had traded below the discount rate for about a week until Thursday, prompting speculation about a discount-rate cut and helping the mar-

kets slightly.
Indeed, the funds rate averaged
7.69 percent in the week ended Wednesday. That was the lowest average since 7.53 percent in the week to June 21, 1978.

After the horrowings news, economists said the low funds rate was smaller amounts (£100 million and thanks to the relatively high cou-£60 million, respectively, of face pons of about 10 percent. Fed Inaction Electricité de France Plans \$400-Million Issue

By Carl Gewirtz International Herald Tribune

PARIS - Electricité de France announced plans late last week to

seek a \$400-million, 10-year multi-purpose facility in the Euromarket. Details about the fees and the drawing costs are to be released this week. The facility, which could be increased if market demand warrants, is basically aimed at pro-viding the French utility with cheaper lines of credit than those that are in place to back its sale of commercial paper in New York. In fact. EdF plans to cancel an equivalent amount of older, more expensive stand-by lines when the new operation is completed.

At the same time, EdF is adding the option to issue Euronotes or to arrange short-term advances from banks — the current rage in the Euromarket. But EdF has no immediate intention to activate these options as issuing commercial pa-per in New York remains a cheaper and more liquid source of funds.

Like most other borrowers who have arranged note facilities but not drawn on them, EdF wants the flexibility to tap the Euronote market in the event that it ever becomes a cheaper source or that a wider, more international investor base is sought to purchase its short-term

While New York remains a cheaper source of funds for companies that issue short-term (usually 28- to 35-day) IOUs, the differential against the Euromarket (as measured by the one-month London interbank offered rate) has narrowed substantially. Bankers reckon that two years ago, 30-day commercial paper was up to 200 basis points (or 2 percentage points) cheaper than Libor. Currently, the difference is 25-to-30 basis points.

Occasionally, the spread is even narrower, Bankers explain that Sweden's recent issuance of shortterm Euronotes at only 3 basis points below Libid (the bid side of the interbank rate), which was sig-nificantly less than Sweden had paid on previous note sales, coincided with an inversion of rates that put the New York CP rate

higher than Libid. Generally, however, Sweden has been paying about the equivalent of the CP rate as interest on its Euronotes is tied to Libid, normally 12.5 basis points below Libor, and the notes have been issued at discounts to Libid averaging some 10 basis points.

There are other, more funda-mental differences between the two markets: size and comportment. The New York market is huge and EdF, for example, one of the biggest European users of the CP market, has several billion dollars of paper outstanding. The fledgling Euronote market is smaller and the

issuance of notes is still treated like rolling over a syndicated credit, \$100-million, seven-year Euronote while the New York market is a issuance facility for Alfa-Laval, the day-to-day operation requiring the Swedish equipment maker. Banks daily attention of corporate treasury officials.

For issuers, especially the U.S.

are being asked to underwrite only \$50 million. Of this, \$25 million is to be available for only three years

SYNDICATED LOANS

CP market, the Euromarket offers a major attraction: the underwritten five-to-seven year commitment of banks to provide credit at a fixed margin over the floating interbank cost of funds. In the New York market, banks usually provide a letter of comfort to the rating agencies stating how much undrawn credit the issuer has at the bank.

The key difference is that the banks in the United States make no commitment on how much they will charge the borrower to draw on that credit.

The annual facility, or commitment, fee of a few hundredths of a percentage point paid to secure the Euronote underwriting is obviously viewed by borrowers as cheap insurance against the possibility that margins charged by banks over the coming five to seven years rise from the current very low levels.

Currently in the market is a \$100-million, seven-year Euronote - for which Alfa will pay an annu-

al facility fee of 6½ basis points. The remaining \$25 million will be available for seven years and the companies which normally tap the facility on this portion is set at 712 action. During the first two years, Alfa

can borrow from the banks or not. In the third year, if it has not borrowed \$50 million, Alfa will pay a nonutilization penalty fee of 21s basis points on any amount over \$25 million that was not used. In the final four years, it will pay that penalty fee on any amount of the \$25 million that has not been drawn. The charge to borrow from the

banks is set at 10 basis points over the interbank rate. In addition, Alfa is paying a one-time front-end fee of 5 basis points on the threeyear commitment and 10 basis points on the seven-year portion.

A \$200-million Euronote facility for the State Bank of New South Wales is scheduled to be launched

Threats of a boycott by U.S. banks of Colgate-Palmolive's \$200issuance facility for Alfa-Laval, the million, five-year facility have proved to be false. Three U.S. banks - one New York bank, one "very large" non-New York bank and one regional bank — have about 25 percent oversubscribed, said a spokesman at Samuel Montagu, which is arranging the trans-

In the classic syndicated credit market, Melior Consorzio, an Italian state credit institution, is seeking a three-part, seven-year loan. This includes \$105 million of floating-rate money with interest set at s-point over Libor and 75 million Swiss francs and 85 million Deutsche marks of fixed-rate funds.

Jordan is in the market for \$200 million, Interest on its eight-year credit is to be set at 12-point over Libor for the first four years and 'spoint over thereafter -higher than the 12-point margin for seven years that it paid last year.

Czechoslovakia is reportedly sounding the market out for terms on a loan of up to \$200 million and bankers report that competition to win the mandate is wild with ru-mors of offers to do the loan at a low la-point over Libor.

KUWAIT FINANCIAL CENTRE S.A.K. Principal Fiscal Agent.

Plants have fed the world and cured its ills since life began. Now we're destroying their principal habitat at the rate of 50 acres every minute.

We live on this planet by courtesy of the earth's green cover. Plants protect fragile soils from erosion. regulate the atmosphere, maintain water supplies for agriculture and prevent formation of deserts. Without plants man could not survive.

Yet, knowing this, we are destroying our own life-support system at such an alarming rate that it has already become a crisis - a crisis for ourselves and an even bigger one for our children.

The figures alone should tell the story we destroy a tropical rain forest three times the size of Switzerland every year; within 25 years only fragments of the vast Malaysian and Indonesian forests will remain.

What we are destroying Much of the food, medicines and materials we use every day of our lives is derived from the wild species which grow in the tropics. Yet only a tiny fraction of the world's flowering plants have been studied for possible use. Horrifyingly, some 25,000 of all flowering species are on the verge of

Once the plants go, they are gone forever. Once the forests go only wastelands remain.

Dr. Richard Evans Schultes, director of the tanical Museum at Harvard University, has spent 13 years in the Amazon jungle collecting the 'magic' plants of myth and legend and making them available to Western medicine and science. "The drugs of the future," he says, grow in the primeval numble.

Who is the villain?

There is no villain - except ignorance and short-sightedness. The desperately poor people who live in the forests have to clear areas for crops and fuel, but they are doing this in such a way that they are destroying their very livelihood.

Add to this the way in which the heart is being ripped out of the forests to meet the demand for tropical timbers and we have a recipe for

What can be done about it? The problem seems so vast that there is a tendency to shrug and say "What can I do?" But there is an answer. The WWF Plant

Conservation Programme The World Conservation Strategy, published in 1980, is a programme for conserving the world's natural resources whilst managing them for human needs. A practical, international plant conservation programme has been pre-pared based on WCS principles and is now well under way all around the world.

You can become part of it The WWF Plant Conservation Programme is a plan for survival which you can help make a reality. Join the World Wildlife Fund now. We need your voice and your financial support.

Get in touch with your local WWF office for membership details, or send your contribution direct to the World Wildlife Fund at: WWF International. Membership Secretary, World Conservation Centre, 1196 Gland, Switzerland.

change, Nigeria would provide the firm with \$500 million worth of oil. The sources said the French state a my a conversion pre oil company Elf-Aquitaine had agreed to purchase the oil. The Nigerian authorities describe such deals as "countertrade" agreements to distinguish them from barter trade of oil for goods or technology. Such agreements are prohibited by the Organization of Petroleum Exporting Countries, to

the flight. Work in comfort. Sleep serenely. Of course these seats are only six across. There's plenty of leg room and plenty of space all round. Try the new experience of floating across

you can always enjoy 6-across seating on all our transatlantic aircraft. Your TWA Travel Agent will tell you all about it.

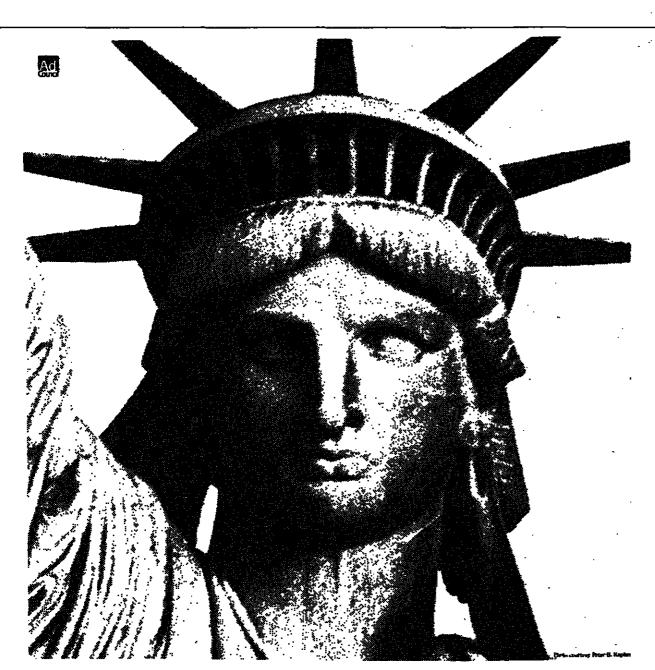

3 When you tilt back – the seat cushion tilts up.

4 Put your feet up - it's made for it.

Leading the way to the USA.

CROIX-ROUGE FRANÇAISE

If you still believe in me, save me.

For nearly a hundred years, the Statue of Liberty has been America's most powerful symbol of freedom and hope. Today the corrosive action of almost a century of weather and pollution has eaten away at the iron framework. etched holes in the copper exterior.

Less than a mile away on Ellis Island where the ancestors of nearly half of all Americans first stepped onto American soil, the Great Hall of the Immigration Center is a hollow ruin. Rooms are vandalized, walls crumbling in decay.

Inspiring plans have been developed to restore the Statue and to create at Ellis Island a living monument to the ethnic diversity of this country of immigrants. But unless restoration is begun now, these two national treasures could be closed at the very time we celebrate their hundredth anniversaries. The 230 million dollars needed to carry out the work is needed now.

All of the money must come from private donations; the federal government is not raising the funds. The Statue of Liberty-Ellis Island Centennial Commission appointed by President Reagan is asking every American to contribute. The torch of liberty is everyone's to cherish.

Could we hold up our heads as Americans if we allowed the time to come when she can no longer hold up hers?

You can keep the torch of liberty burning bright. Send your taxdeductible contribution to The Lady, Box 1986, N.Y.C. 10018. Or call, toll free, 1-800-USA-LADY.

Accor

The Board of Directors of ACCOR, meeting on April 18, 1985, examined the 1984 financial statements.

Group consolidated sales amounted to F.Fr. 9.861 million, up 21.3 %

over 1983.

International operations experienced a 32.3 % growth in sales and domestic operations in France were up by 12.7 %. Hotel operations alone rose 22 % and other operations grew by 20.5 %.

The Group's share inconsolidated net after tax income, came to F.Fr. 142 million, a 53.8 % increase over 1983 earnings of F.Fr. 92.4 million evoluting exceptional items. Taking into account the January. 1984 capital increase net earnings per share grew by 20.6 %.

ACCOR parent company pre-tax sales amounted to F.Fr. 790 million and net income to F.Fr. 71.1 million.

At the General Meeting of Shareholders to be held May 28, 1985, the Board will propose payment of a net dividend of F.Fr. 4.90 per share (plus a represents a 16.7 % increase over the 1983 dividend and will be paid out on capital increased by 27.5 % during 1984. In terms of both sales and results. ACCOR's 1984 performance exceeded the in the French hotels.

The outlook for 1985 is promising.

in the French hotels.

The outlook for 1985 is promising.

More than 40 new hotels will be opened in cities around the world, including Paris (at Les Halles), Coteborg, Lisbon, Munich, Bangui, Lambaréne, leddah, Atlanta, Toledo and Toronto, Construction will begin on roughly this same number of hotels, mostly in the Asia-Pacific region.

Sweden, ACCOR has now also gained a substantial position in the U.K.

market.

Moreover, ACCOR's recent acquisition of a stake in the Gaston Len6tre Group will open up new opportunities in the restaurant business. Finally, the ACCOR Academy for staff development became fully operational during the first quarter. The Academy is a reflection of the Company's commitment to professional service and quality on the part of its people. A 19 % increase in net carnings per share has been targeted for 1985. Results so far this year have been in keeping with this objective.

ACCOR Board of Dire

French Inflation Is Above Forecasts

PARIS - The government statisties bureau said French consumer than government projections and predicted that annual growth would fall well below that of France's European neighbors.

1

OCEA A A A Dec

The statistics office on Friday confirmed provisional figures released earlier in the month showing a price rise of 0.7 percent for Inland Steel to Import March. The increase pushed the inflation rate for the first quarter to From Far East Source

1.8 percent.

The Socialist government had pledged to hold inflation to 4.5 mains steady.

In 1984, France overshot its target of 5-percent inflation with a 6.7-percent rise in prices.
The European Community has

New York Topes Service CHICAGO - Inland Steel Co. pledged to hold inflation to 4.5 said it plans to import some 18,000 percent for the year. But first-quarter results would produce annual procerises of at least 5.5 percent if month, Inland, which is based in inflation revers to government. inflation reverts to government Chicago, said it would be import-projections and the U.S. dollar re-ing the slabs to meet a large, unnamed automotive customer's

nevis. The company said the auto company requires sheets of flat-rolled steel that are wider than the flatpredicted France would record 6.4-percent inflation this year, com-pared to 2.4 percent in Holland, 2.5 land's Indiana Harbor Works.

percent in West Germany, 5.7 per-cent in Belgium and Denmark, 6 percent in Britain, 9.3 percent in an partners.

The statisticians said France would face a \$2.7-billion deficit this year if the exchange rate of the dollar averaged 10 france and \$1.9 billion if the dollar averaged 9.5

Business investment is likely to be flat this year after falling last year, though a pickup in demand from spring onwards could lead to some rebuilding of stocks, the sta-tistics office said. Household purchasing power

should be strengthened by tax cuts in the second balf of the year, allowing some increase in consumption after a stagnant first half, it Industrial activity is likely to ex-

pand slowly after first-quarter disruption caused by a harsh winter, but even with some growth about 170,000 industrial jobs will disappear during the year, representing a 2.7-percent fall in industrial employment, it said. (UPI. Reuters)

Kuwaiti Firm Reports Loss

KUWAIT — The state-con-trolled Kuwait Investment Co.

said Sunday it had a 1984 loss of 32,30 million dinars (about \$10.7 million), 66 percent more than in 1983. It attributed the loss mainly to persistent prob-lems in resolving a crusts caused by the collapse of the unofficial Souk al-Manakh stock market

Describing 1984 as "a tough year for KIC and the Kuwaiti economy in general," the com-pany's chairman, Hamad Mo-hammad al-Bahar said weak oil murkets and the Iran-Iraq war had also depressed business.

KIC said its loss was written off and covered by a transfer from the group's general reserve. Group total assets fell 8.5 percent, to 304,30 million dinars in 1984, and total shareholders' equity was reduced by 21 percent, to 59.56 million di-

Arab Investor Group Gambles on Italian Refining

(Continued from Page 15)

While Italian energy officials have expressed sympathy with the idea of deregulation, a veteran Italian oilman cautioned that "from the words to the fact it takes time."

Whether First Arabian is right probably will not be evident for years. Since the company is privately owned and secretive, its past performance is difficult to judge. "We're private guys," said Mr. Steckel.

The little information that can be obtained suggests that First Arabian's hopes of turning around troubled companies do not always work out. In the 1970s, First Arabian invested in tottering banks in London and Detroit. In both cases. it eventually sold out at a loss.

Despite occasional setbacks Mr. Tamraz and Mr. Steckel, now in their mid-40s, have remained a

Market Guide

Metals

In London, First Arabian paid £1.3 million (\$1.58 million) in 1975 to acquire 25 percent of Edward Bates & Sons (Holdings) Ltd., which owned a small merchant bank. Bates was suffering from problem loans to the property and Greek-shipping markets and from heavy losses arising from the purchase of a life insurance unit.

But hopes were high once First Arabian stepped in, David Keown-Boyd, chairman of Bates, wrote in the annual report of "opening the door to those great surpluses now lying at the disposal of Arab oil producers."

A year later, trading in Bates shares was suspended, and the Bank of England began working on a rescue. After long negotiations, the Bates merchant hanking unit was sold for a nominal sum to another group of Arab investors and Barclays Bank, then relaunched as Allied Arab Bank.

kel insisted, Barclays Bank, then relaunched as	POSITIONS WANTED

THE CARVING OF MOUNT RUSHMORE

By Rex Alan Smith. 415 pp. Illustrated.

Abbeville Press, 505 Park Avenue, New York, N. Y. 10022.

Reviewed by John Gross

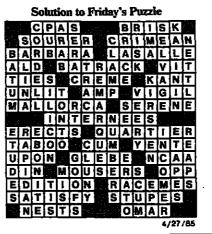

THE Mount Rushmore Memorial is one of I the great American icons — you can joke about it in a cartoon or send Cary Grant clambering over it in a movie and expect more or less everyone to recognize it. But how did it get there?

Rex Alan Smith, who was born and raised within sight of Mount Rushmore, has written an entertaining account of the memorial and the men who made it. He got to work only just in time, while it was still possible to talk to those who had been closely involved in the project in the 1920s; he has been able to preserve a great deal of local lore, and what his book lacks in depth it makes up for in firsthand detail. The idea of carving a monument in the Black

Hills was dreamed up in 1923 by Doane Robinson, a bookish lawyer who had gravitated into the role of official historian of South Dakota and who was looking for new ways of attracting tourists. After drawing one or two blanks, he approached a sculptor who in fact seemed the obvious first choice, Gutzon Borglum. Not only was Borglum (who had studied under Rodin, and enjoyed an international reputation) renowned for his patriotic statuary, he was already addressing himself to the peculiar problems of mountain-carving, having been commissioned to conjure up a giant group of Confederate notables on Stone Mountain in

The Stone Mountain project was eventually abandoned amid ferocious quarrels - a warning of what the Dakotans could expect. Borglum was egocentric, domineering, short-tem-pered, often childish. But he was also a tornado of energy who knew how to get things done, and Mount Rushmore captured his imagination. (The site was suggested by a state forester, though later Borglum liked to claim that he had come upon it while reconnoitering in the

And what exactly was to be carved? The

Rushmore executive committee did not so much make a decision as stumble its way into one. Doane Robinson's original idea had been that the monument should represent the heroes of the Old West, but Borglum persuaded him that a group of presidents would have greater national appeal. At first, there were to be just two, Washington and Lincoln; then Borglum, always eager to make the project as big as possible, proposed Jefferson (an appropriate choice, he explained since the Black Hills had been part of the Louisiana Purchase). Finally Theodore Roosevelt was added.

This last choice was the most controversial - it came about simply because Borglum and his chief supporter among the politicians of South Dakota, Senator Peter Norbeck, were both ardent admirers of Roosevell. (The sculp-tor had been chairman of his local branch of Roosevelt's Progressive Party during the "Bull Moose" election campaign of 1912.) But whatever the politics behind the decision, in visual terms it made all the difference, changing what would otherwise have been a predictable grouping into something rather startling, like an enormous piece of Pop art. It also gave Borglum a chance to display his virtuosity in creating the effect of a pair of spectacles with the very limited means available to him.

Money was a constant problem. An important corner was turned when President Calvin Coolidge's support was enlisted, after he had been persuaded to spend the summer of 1927 in the Black Hills for the sake of his bronchitis tand put in a good humor by his apparent skill at catching trout — in fact, the creek where he fished had been surreptitiously stocked with some tired old breeding-trout from a local hatchery). Even with federal backing, however, it was often touch and go as to whether the project would have to be given up for lack of

Along with the financial worries, there were fierce personal disputes and endless political wrangles. Few of these are of any great interest today, and Smith spends rather too much time on them; on the other hand, he is always worth reading when he writes about the actual process of carving and the various techniques involved — the first roughing in of features on an enormous egg-shaped mask; drilling, dynamiting (in moderation). "honeycombing" close down to the final "skin" of the sculpture; the fine finishing that allowed Borglum to add mounds and hollows and wrinkles.

Smith has worked in the mines and quarries. of the Black Hills, and one of the great virtues of his book is the amount of space he gives to the workmen who built the memorial, bringing to life the skills they mastered and the often daunting conditions confronting them. But it is Borglum who predominates in the end, as much as anything else by his sheer ingenuity at devising a system for transferring his designs from a studio model to the mountain face, or at coming up with the all-important trick by which he managed to impart a lifelike quality to the eyes of his presidential quartet.

The memorial was finished shortly before

Pearl Harbor. It was the product of an era when, for most Americans. Big was still un-ashamedly Beautiful, and it did what it was intended to do remarkably well.

Creme Fraiche Victor in Derby Trial Stakes

LOUISVILLE, Kentucky (AP) — Creme Fraiche charged between horses in the stretch to win the Derby Trial Stakes by a half-length over Fast Account on Saturday, the opening day at Churchill Downs. It was the last prep race for next

Saturday's Kentucky Derby here.

It was the third straight Derby Trial victory for trainer Woody Stephens.

Stephens won the 1983 trial with Caveat, who finished third in the Derby, and he won it last year with Devil's Bag, who missed the Derby. Stephens won the 1984 Derby with Swale.

Creme Fraiche, winning for the first time in six starts this year after four second-place finishes, is nominated for the Derby. But Stephens, who has another Derby candidate in Stephan's Odyssey, said before the race that Creme Fraiche would start only if there was an off-track. Creme Fraiche showed his liking for poor conditions in the Derby Trial, as he went through a pack of horses on a sloppy track to run down Fast Account and Tiffany Ice and cover the mile in 1:37-3/5 under 119 pounds. Nordic Scandal beat out Tiffany Ice for the show position.

Chang Keeps WBC Title on Split Decision

SEOUL (UPI) — Chang Chong-Ku of South Korea retained his World Boxing Well and my curve had a nice break to it." Hershiser said, "I'd have to

Judges Mike Jacobs of Britain and Lou Palipo of the United States awarded the fight to Chang with respective scores of 116-114 and 115-114; U.S. judge Chuck Hasset scored it a 114-114 draw. There were no knockdowns.

It was the sixth title defense for Chang, whose professional record is 27-1-0.

Torres, the WBC's top-ranked contender, has a record of 48-8-1.

FIFA Fines 4 Nations for Soccer Incidents

ZURICH (AP) - Chile has been fined \$5,770 for spectator violence and "poor stadium organization" at a World Cup qualifying game against Uruguay March 24. FIFA, the international soccer authority, announced Saturday. The fine was the highest of four announced by the federation. Spectators in Santiago threw objects onto the field, one of which hit the referee

and forced play to be interrupted, FIFA said.

The other three fines: \$3,850 against Uruguay because thrown objects had hit players, linesmen and the referee at an April 7 game against Chile in Montevideo; \$3,850 against Saudi Arabia because spectators in Riyadh had assaulted the referee in an April 12 game against the United Arab Emirates, and \$3,850 against Qatar because objects were thrown onto the field (one player was hit) during an April 12 game against Jordan in Doha.

3 Share 1-Shot Lead in Houston Open Golf

THE WOODLANDS, Texas (AP) - Keith Fergus, Payne Stewart and Ray Floyd edged away from a tight field to share a one-stroke lead Saturday after three rounds of the Houston Open golf tournament.
Fergus and Floyd carded 69s and Stewart had a 70 for a total of 8-under 208 over

the par-72, 7,042-yard (6,408-meter) Tournament Players Course at The Wood-lands. They held a one-stroke lead over five ment at 209. Jim Simons, who had a 67 on Friday for a two-stroke lead after two rounds, shot a 75 for a three-round total of 210.

United Press International

GALESBURG, Illinois - Going, going, gone.

And keep right on going, says Hermann Muelder, a

Knox College history professor who proposes that

over-the-fence home runs be regarded as foul balls

Muelder proposed the rule change in a recent

plea to support the characteristics of baseball that

set it apart from other U.S. sports. "Baseball is a

game in which various things happen to the ball

itself," he said. "But in scoring, it's not what happens to the ball that makes the score. It's what

happens to the player."

Muelder noted that in football and basketball,

the ball itself must cross the goal line or pass through the hoop. In baseball, it is the player who

Hatcher's Bat Helps Twins to 7th in Row

MINNEAPOLIS — Mickey Hatcher wanted Saturday's game

to go on and on. "I was thinking, 'Get me up again.' You know when you're hot, you want to stay up there," said Hatcher, who went 5-for-5 and drove in two runs in the Minnesota

Twins' seventh straight victory, an 8-6 triumph over the Oakland A's. Hatcher hit three singles and a double, all on first pitches from

SATURDAY BASEBALL

former teammate Don Sutton. He also singled off reliever Jeff Kaiser in the seventh. It was the first fivehit game of Hatcher's career. Hatcher had been 3-for-21 (and

0-for-9) before Saturday's game, and had been in danger of being benched. "He's been struggling a little bit," said Manager Billy Gardner. "If he didn't get any hits l was probably going to bench him."

"It was just one of those days," Hatcher said, recalling how Sutton had taken him aside when he first came up with the Los Angeles Dodgers, "He helped me grow up a lot, just by being a gentleman off the field, I respect the guy." Dead-panned loser Sutton: "I didn't think Hatcher would take it this

Minnesota sent nine hatters to the plate in the second inning and took a 3-0 lead. Doubles by Gary Gaetti and Greg Gagne produced the first run: After Kirby Puckett walked with two out, Hatcher and Kent Hrbek delivered run-scoring

singles.
Oakland nicked starter pitcher Frank Viola for a run in the fourth on Dusty Baker's sacrifice fly, but Minnesota battered Sutton for four runs in the bottom of the inning.

Royals 5, Red Sox 4

In Boston, Jim Sundberg had three hits and scored the winning run in the ninth on an error by second baseman Marty Barrett as Kansas City edged the Red Sox. Sundberg led off the inning with a single off Bob Stanley. Onix Con-cepcion bunted and first baseman Bill Buckner threw the ball past second attempting to get Sundberg, Barrett then booted Willie Wilson's grounder, allowing Sundberg to

Tigers 3, Brewers 2

In Milwaukee, designated hitter Alex Sanchez drove in three runs with a triple and a two-run home run to lead Detroit past the Brewers. Sanchez, acquired in a minorleague deal with San Francisco earlier this month and appearing in his fourth game with Detroit, hit his first homer of the season on a 2-2 pitch from Danny Darwin in the

White Sox 5, Yankees 4

In Chicago, Carlton Fisk singled home pinch-runner Rudy Law from third base with none out in the 11th to cap a two-run White Sox rally that edged New York.

Indians 10, Orioles 4

In Baltimore, Joe Carter, Butch Benton, Tony Bernazard and Brook Jacoby drove in two runs apiece, helping Cleveland to end a four-game Oriole winning streak.

Blue Jays 9, Rangers 8

In Arlington, Texas, George Bell singled in Lloyd Moseby from second base with one out in the 10th to lift Toronto over Texas. Willie Aikens sent the game into extra innings with a two-run pinch-hit home run in the Blue Jay ninth.

Angels 6, Mariners 1

In Seattle, Brian Downing drove in four runs with a homer and a single and Jim Slaton scattered seven hits as California sent the Mariners to their seventh straight loss.

Expos 8, Cardinais 3

In the National League, in Montreal, Tim Wallach's bases-loaded two-run single highlighted a fourrun seventh and Andre Dawson drove in five runs as the Expos blew triumph. Dawson drove in one run

Pirates 3, Mets 2

In New York, a throwing error by reliever Jesse Orosco triggered a three-run eighth that led Pittsburgh past the Mets.

Reds 2, Giants 1

In San Francisco, John Stuper' two-hitter and Eric Davis's third home run of the year put Cincinnati past the Giants. Stuper yielded an RBI double to Chili Davis in the first and then retired 19 batters in a row.

Phillies 6, Cubs 1

In Philadelphia, Glenn Wilson drove in three runs with a triple and a sacrifice fly to help the Phillies beat Chicago.

Braves 8, Astros 2

In Houston, pitcher Rick Mahler took the league lead in victories by winning his fifth game, and Dale Murphy hit his league-leading eighth and ninth homers as Atlanta cruised past the Astros.

Padres 4, Dodgers 3

In Los Augeles, pinch-hitter double in the seventh snapped a 2-2 tie and propelled San Diego past West Germany scored three power-play goals in the Dodgers. It was Bevacqua's fourth pinch hit in as many at-bats this season. (UPI, AP)

Nordiques Take 3-2 Lead Over Canadiens

By Kevin Dupont

New York Times Service diens were outplayed — they had MONTREAL — The Quebec only 13 shots — the rest of the way. Nordiques didn't have Michel Maxwell, acquired in trade from Goulet Saturday night. But they did have some of the National Hockey League's lesser offensive talents, such as Brad Maxwell, Alain Lemieux and Brent Ashton; and they did have Dale Hunter, grinding, hacking chopping and instigating as usual.

In the end, the Nordiques had the Canadiens in their grasp. Paced STANLEY CUP PLAYOFFS

by five different goal scorers, the province's "other team" rolled to a 5-1 victory over the Canadiens and a 3-2 lead in the Adams Divisionfinal playoff series. The winner will go on to face either Philadelphia or burgh rookie sensation Mario Le-

the New York Islanders in the

Stanley Cup semifinals. Cut down by a Ric Nattress came to the team in trade this year, check in Game 4, all-star left wing fired one for the 4-1 lead. Goulet, touted as a new Guy Lafleur, was unable to play because of a sore back. "Without Goulet in the with instant trouble. Will Paiement lincup, I asked the other guys to took a pass from Lemieux, like his pick up the slack," said Michel Berbrother a good stickhandler, and geron, the Quebec coach. "I asked them to give a little more — and

they all did." The Canadiens, with 21 Stanley Cup flags draped from the rafters of the Forum, could use someone like the old Lafleur. They play a goal. "But I don't think they have conservative, methodical defensive ame these days that hardly resembles the old skate-and-shoot meth-

ods of the Flying Frenchman. No one better exemplified that style than Lafleur, as he rushed up his wing, goalies ducking as he unloaded blistering shots. But Lafleur retired during the regular season and is now in Florida. He may be Russians (7-0) Cruise to Finals joined by many of his former team-

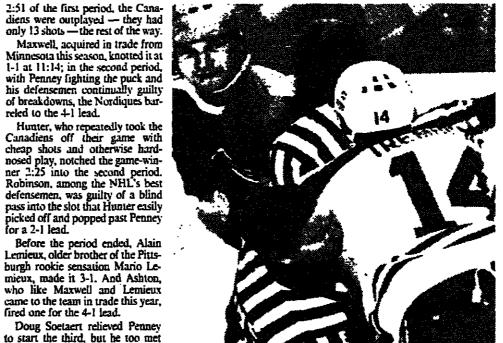

mates by mid-week. can work on things that are important - taking (ace-offs, working on special situations. But nothing takes the place of someone who can

sometimes without looking." And it is Goulet, with three than 50 goals, who comes closest to the Canadiens' old style. And with-out him Saturday the Nordiques were smart enough, even when fall-ing behind by 1-0, to play a patient

game. They waited, cautious in

their own end, and finally made the

most of their chances against goalie Steve Penney. Penney was another loss the Canadiens suffered. After allowing three goals in the second period, and falling behind by 4-1, he was

Two officials had their hands full stopping a first-period fight

Me Safire, You Not Jane

By William Safire New Zealand, a nice country with a democratic tradition, ain't what it used to be. Wellington doesn't want U.S nuclear-armed vessels visiting its ports, and Washington thinks a military alliance must be a two-way street. Seeking to capture the new feeling between Yanks and Kiwis in a phrase. I hit upon a song that Russ Columbo made famous recalling its title as "Friends, Lov-

Not quite right. As a large detachment from the Nitpickers' League reminded me, the correct title of that 1931 song is "Just Friends.

How many other near-misses afflict people who like to be accurate in their language? Try, for example, writing "Play it again, Sam," thinking you are calling up the words said by Humphrey Bogart to Dooley Wilson in "Casablanca." A herd of insomniacs will bear down on you with tapes and scripts prov-ing the line to be "Play it!" without the "again, Sam."

Same goes in politics: Herbert Hoover never promised "A chicken in every pot": that was a canard, not a chicken, helped along by Al Smith, who derided a 1928 Republican campaign flier with that title, which quickly became a "quotation" directly attributed to his opponent (It was King Henri IV of France who was le Roi de la poule au pot.) Nor did Marie Antoinette "Let 'em eat cake"; nor did Richard M. Nixon ever say "I have a secret plan to end the war," as George Romney's 1968 supporters contended that he did.

The obsession with accuracy was driven home to me by Judge Jon O. Newman of the 2d U.S. Circuit Court of Appeals in Hartford, Connecticut. În a recent piece, Î used a line from an early Tarzan movie that has become part of the language. You know the one: "Me Tarzan, you Jane." Newman writes: "This is perhaps the most widely used quotation of a nonexistent line from movie dialogue, exceeding in frequency even the well known and equally non-existent line 'Play it again, Sam.'

"Three years ago a case in our court brought to our attention the exact lines from the original 1932 film 'Tarzan, the Ape Man.' We took the occasion to set the histori-

WASHINGTON — The Unit-ed States's relationship with a copy of the pertinent page of the court's opinion, written by Newman's colleague, Judge Amalya Lyle Kearse, setting out the correct dialogue in footnote 20:

> Contrary to popular belief, the line "Me Tarzan, you Jane" (or, as it is sometimes quoted, "You Tarzan, me Jane") does not appear in the 1932 film. The actual dialogue is as fol-

[Tarzan causes an ape that has (rightened Jane to leave her alone) Jane: Thank you for protecting [pointing to herself] me. Tarzan: [tapping her on the

chest | Me. Jame: No. [pointing to herself] I'm only me for me. Tarzan: [tapping her] Me!

Jane: No. [pointing to him] To you I'm you. Tarzan: [tapping himself on the chestl You

Jane: No. [pause] I'm Jane Parker. Understand? Jane. Tarzan: [tapping her] Jane. Together: [Tarzan taps her] Jane.

Tarzan: [tapping her] Jane. Jane: [nodding] Yes, Jane. Jane: [pointing to him] You? Tarzan does not respond; she

points to herself1 Jane.

Tarzan: [tapping her] Jane. Jane: [pointing to him] And you?

Tarzan: [tapping himself] Tarzan. Tarzan. Jane: [slowly] Tarzan.

Tarzan: (alternately tapping her and himself, harder and harder each timel Jane. Tarzan. Jane. Tarzan, Jane, Tarzan, Jane, Tarzan, Jane, Tarzan, Jane, Tarzan,

Jane: [exasperated] Oh, please stop. Let me go. I can't bear this. [realizing he cannot understand] Oh, what's the use?

The use --- the purpose in widely disseminating this obscure but significant judicial footnote - is not merely to show the difficulty of teaching language to ape men, but to provide irrefutable proof that a phrase our society has come to believe was once said was, in fact, not said. It is a superb specimen of near-miss quotation." and we are all indebted to the federal bench's record-straightening 2nd Circuit. (You appellate judge; me language

New York Times Service

Jamaica Kincaid: Words and Silences

"I drank and drank until all that was left was the bare dry seahed. All the water from the sea filled me up, from my toes to my head, and I swelled up very big. But then little cracks began to appear in me and the water started to leak out first in just little seeps and trickles coming out of my seams, then with a loud roar as I burst open." From "Annie John"

By Jacqueline Trescott ington Post Service

7ASHINGTON — Having WASHINGTON — Inc. mg hood in Antigua, Jamaica Kincaid, at 35, has let her memories burst open into two books — the prize-winning "At the Bottom of the River," last year, and the new "Annie John." But, sitting in a hotel room here with her 4month-old daughter, Kincaid was a study in hesitancy and a warrior

for privacy.

She was wearing loose tan pants, a white shirt, purple socks and black flats; her hair was a natural brown, brushed close to her head. All this is changed from an earlier, wildly flamboyant period.

In New York, where she lives with her husband, the composer Allen Shawn, it is fairly well known that she created the name Jamaica Kincaid.

"I'd rather not speak about that. It just brings up too many things, including my mother's feelings," she said. "When you write about your life, if you write about things that are private, you have to be careful. There is a profound meaning to it. I don't want to make something I did very consciously into an anec-

But already, in the books, she seems to have revealed so much. In "Annie John," the mother has a trunk under the bed and the girl character is smart, mischievous, funny. Kincaid said her mother had a similar trunk, but she doesn't want to call the work autobiographical.

She even withheld her photograph from the book jacket. She is a statuesque woman who once drew so much attention in New York that The New Yorker magazine — where she is now a staff writer - wrote about her in

its "Talk of the Town" section. "I just can't bear to mention this. I used to dress in a strange most mischievous. It must clearly

way," she said. "I just was quite odd. I just used to have very short hair, which I dyed bloud. I wore anklets. This is in the days when I never saw anyone wearing anklets and saddle shoes. I wore circle skirts or tight skirts. I used to have lots of old clothes. Part of it was I couldn't afford new clothes and part of it was basically I dressed then the way I remembered my mother dressing long tight skirts, pedal pushers. I had no eyebrows. I was just expressing myself. It was great

For her first 17 years, Kincaid lived in Antigua, one of four chil-dren. They lived in the capital city of Saint Johns in a small wooden house, painted canary yellow with a red roof and a garden of bachelor's buttons and marigolds. Like the Annie of her book (Annie is also her mother's and daughter's name) she had a

strict education. "It must be said that perhaps some of it clearly is me. I was be about me as I mythologized my growing up. The real thing that is autobiographical is the feelings," she said. "If I had written a profile of my mother or my life and The New Yorker factchecking department had checked it it wouldn't have gone through."

She evokes childhood thoughts and sensations, such as wanting to see what a dead person looked like, or discovering the joys of a View Master slide viewer, or cringing at a mother's disapproval. or selecting friends on the slightest whim.

At the end of the book, Annie leaves for England to study nursing, the same fate planned for

What finally happened was that she landed in New York in 1966, worked as an *au pair* girl for two years, then went to school in New Hampshire for two years, where she studied photography.
"I saw a film called 'La Jeta,' a

five-minute film made up of still photographs but in the middle. something actually moves. It had a profound influence on me. My life was never the same. In the middle of wanting to be a photographer, I started to write out my photographs," she recalled.

Slowly she added other writers. such as the Frenchman Alain Robbe-Grillet, to her schoolgirl models of Dickens. Hardy. Mil-ton, Shakespeare and the Bible. Robbe Grillet "was my first experience with modern expression," she said

She ended up back in New York, writing features for Ingenue magazine, getting people such as Alice Cooper, Gloria Steinem, Yoko Ono and Jim Brown to reminisce about what they were like at age 17. She also wrote about culture for The Village Voice and free-lanced for The New Yorker. She became known as a personality and a style setter.

Now, even while being interviewed, she said she wanted to protect her privacy, "even though am the first person to look at the book jacket to see what the writer looks like.

The source of her writing is the Caribbean and the irresolvable status of exile. "I couldn't live at home anymore, but I am not really Ameri-

can I sort of cling to the West Indies. But the truth is I am really " and she stopped, trying to find the right word for the home-less artist. "I am West Indian. It is in my blood. But I can't live there. I am not American. I don't feel black American. If you are a West Indian, you don't really feel black, you just are West Indian. I am permanently nowhere — you spend your life writing about a

place where you can't be." Though Kincaid feels a kinship to the Caribbean writers, she feels no special link to the black American women writers who have had a wave of acceptance from publishers in the past five years.

"When I am writing I feel so much like an individual, so different, so unconnected to everyone, so unconnected to any group of anybody that I couldn't write and feel I am a black writer. In fact, I don't know what it feels to be a black anything. I know I am black. I think I feel I know enough about life to appreciate the accident that that is. My just being alive, period, that's enough of an inspiration, that I am alive.

SRI LANKA POSTCARD

A Spot of Tranquillity

Linited Press International

NURADHAPURA, Sri Lanka — It is a paradox the Buddhist A of Sri Lanka's ancient capital might have appreciated. The viole between the country's two main ethnic groups has brought tranquit this city on the boundary between the Sinhalese south and the north and northeast.

The disappearance of the tourists who once flocked to Anuradha

has made the city just that much more attractive to those who do venture into the heart of Sri Lanka. Anuradhapura, 128 miles (200 kilometers) north of Colombo, is most easily reached by train. The northern express, with its firstclass, air-conditioned coaches, is often canceled due to the fighting, but slower trains run at least twice a day. A second-class ticket costs less than \$2. The slow train gives the traveler

an intimate look into the back yards of rural Sri Lanka -- villagers pathing in streams that pour down from the mountains, cooking in the open-door kitchens of their thatched dwellings, swinging in hammocks watching the trains go

in Anuradhapura, the place to stay is the Tissawewa Rest House, the town's first hotel. It was converted from the bungalow of the British political agent who administered the region.

The 118-year-old structure, filled with Sri Lankan art and memorabilia, has a broad veranda lined with potted plants and rocking chairs. Two cool string beds with canopies provide a resting place for those too mellow to rock. On the veranda ceiling, fans twiri slowly overhead.

The veranda overlooks Tissawewa Tank — a small lake dug centuries ago to store water for agriculture - and a flower-filled earden where troops of monkeys whood at sunset. Unlike most of the hotels that

have followed it, the Tissawewa is in among the ruins of the ancient city, designated a sacred area.

One drawback is that, because of the sacred nature of the mins, the hotel does serve alcohol. No one objects, however, if you bring your own and slip a little gin into a Tissawewa fresh lime and soda.

Be warned, the Tissawewa is the highest-priced hotel in Anuradhapura. A single room costs 418 rupees, including supper and service - but that is less than \$17, and with a bit of bargaining the rate can

PARIS AREA FURNISHED

T JEAN CAP FERRAT, French Rivi

The Tissawewa, like the respective tourist industry, is suffering from the communal strife that has plagued the districts north of Anuradhapura, although the city has been untouched. Once it was necessary to book weeks in advance to: stay at the Tissawewa, but on a recent weekend only three of its 25 rooms were occupied.

The dearth of tourists gives a serenity to the Buddhist monuments spread among the groves and lawns of Anuradhapura. Legend says the city was found-

ed in the 4th century B.C. and served as the capital for 118 kings before fighting between the Sinhalese and the minority Tamils forced the abandonment of the city in the 9th century. It was reclaimed from the jungle in the early 19th century.

The traveler can meditate under a sacred bo tree said to have been grown from a cutting of the tree under which the Buddha achieved enlightenment, or inspect the mighty 300-foot (91-meter) dome of the Ruwanveliseya. Also open to wanderers are the 1,600 stone pillars of the Brazen Palace.
